

RPW Light

Upper disk has cutouts for heat diffusion and further light transfer.

20" diameter

Lower disk acts as retaining ring and allows for maximum light downward

Slat (in profile)

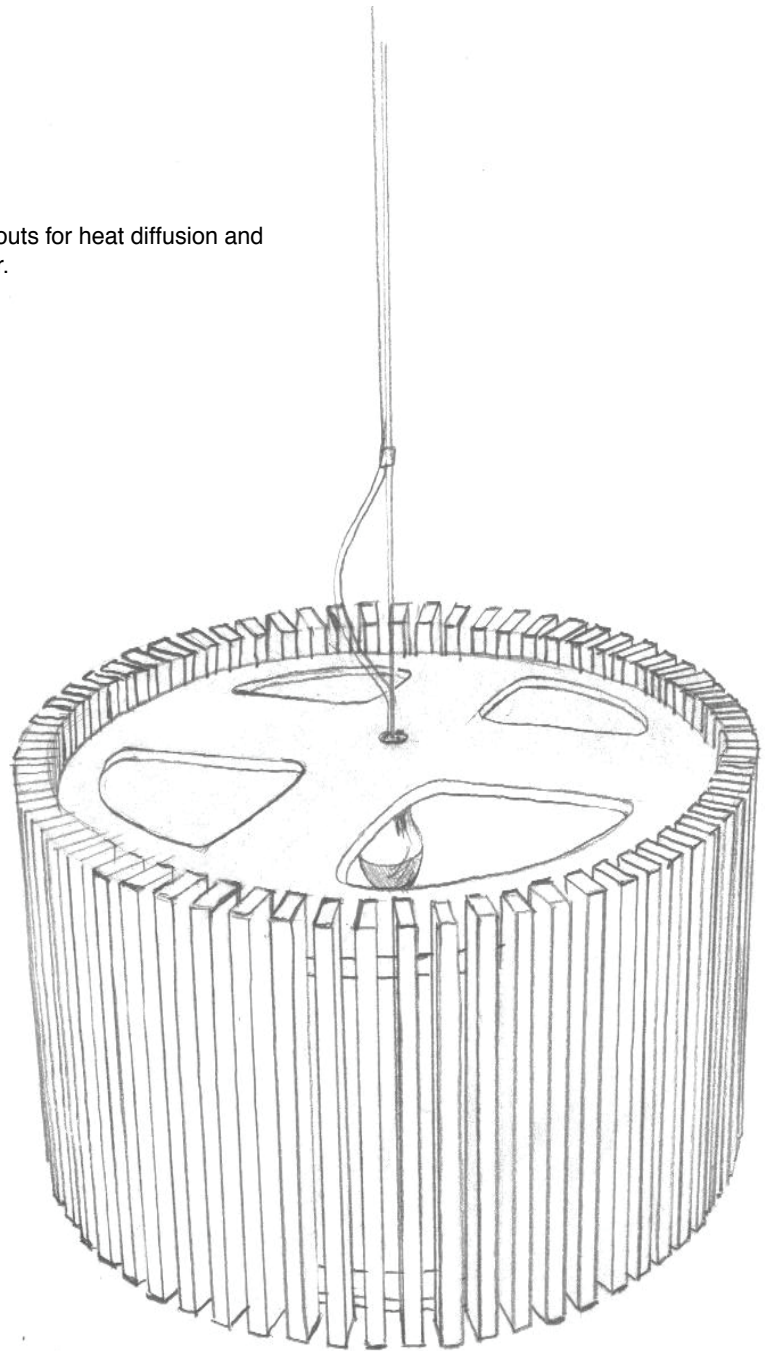

Slat (inside edge) with silver leaf

Sterling Silver leaf is applied to the inside edges of the slats to enhance reflectivity, and add a touch of class... 'bling'

Alternate sizes and shapes are available

This design can also work with a diffusion panel inside and/or on the bottom

RPW Light

Bamboo slats and retainer rings

Silver leaf on interior edges/surfaces

Natural wax and oil finish

30"x30"x20" (Large size)

Other sizes available
