Experimental Hematology

Official Publication of the International Society for Experimental Hematology

YES! Please send my **FREE** trial issue of *Experimental Hematology*, (0301-472X) volume 33. After I receive my first issue I will receive an invoice. If I choose to subscribe, I will return the invoice with a payment of \$305.00 Individual rate; \$659.00 Institution rate to continue my monthly subscription for a full year (that's 13 issues for the price of 12, plus the annual special supplement). If I decide that *Experimental Hematology* is not right for me, I will write "cancel" on the invoice and return it within 30 days. The trial issue is mine to keep, no matter what I decide!

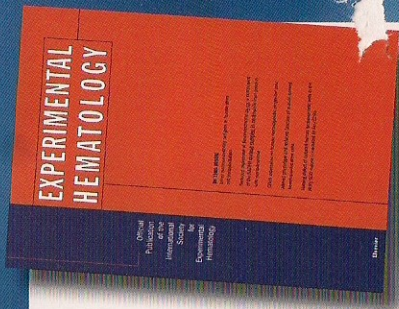

E-Mail _____

You will receive periodic e-mails from us informing you of new products, special offers, promotions relevant to your selected area(s) of interest, and occasional market surveys.

Experimental
Hematology

IN THIS ISSUE

Minor histocompatibility antigens in human stem cell transplantation

Reduced expression of flavocytochrome b558, a component of the NADPH oxidase complex, in neutrophils from patients with myelodysplasia

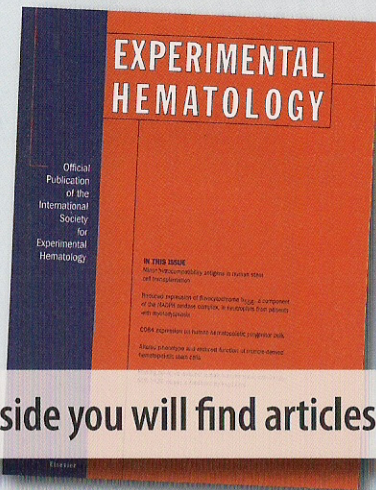

CD34 expression on human hematopoietic progenitor cells

Altered phenotype and reduced function of muscle-derived hematopoietic stem cells

Homing defect of cultured human hematopoietic cells in the NOD/SCID mouse is mediated by Fas/CD95

Elsevier

Authoritative reporting on the most essential new developments!

A leading forum for both basic science and clinical research!

Turn to *Experimental Hematology* for the latest advances in experimental, pre-clinical, and clinical development in hematology and immunology.

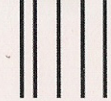

Inside you will find articles that explore...

- ▶ *in vivo* and *ex vivo* studies in cell cycle regulation
- ▶ cytokines
- ▶ erythropoiesis
- ▶ gene therapy
- ▶ general hematopoiesis
- ▶ granulopoiesis
- ▶ hematological malignancies
- ▶ immunobiology
- ▶ immunotherapy
- ▶ lymphopoiesis
- ▶ megakaryocytopoiesis
- ▶ microenvironment
- ▶ monocyte development
- ▶ molecular genetics
- ▶ signal transduction
- ▶ stem cell biology
- ▶ stem cell plasticity
- ▶ experimental and clinical stem cell transplantation

Your subscription also includes the **annual special supplement** containing the program and abstracts from the International Society for Experimental Hematology (ISEH) Meeting.

Subscribe today!

Experimental Hematology ranks 11th among 62 journals in the hematology category on the *ISI Journal Citation Reports (2003)*.

International Society for Experimental Hematology

The mission of the International Society for Experimental Hematology (ISEH) is to promote the scientific knowledge and clinical application of basic hematology, immunology, and cell therapy through research, publications, and organization of scientific programs.

For more information on the Society or to join (and receive *Experimental Hematology* as a benefit of membership) visit www.iseh.org or call 1-212-367-1183.
