

This is an extensive web copy rewrite I performed for the SERIES Seating website.

## HOME PAGE

SERIES Seating is the world's leading innovator of church seating. With the turn of the century, SERIES introduced the first auditorium seating system designed specifically for the worship environment. Today, we continue to develop and revolutionize church pews, auditorium seating, and stackable chairs to make efficient use of your space and resources. No other line of worship seating products meets your stewardship objectives better. Real solutions that exceed industry standards - that's church seating by SERIES.

## CHURCH SEATING PRODUCTS PAGE

### Theater Seating for Churches

When SERIES Seating introduced church auditorium seating to the worship market in 1999, the focus on stewardship over the style of conventional church pews changed how churches estimate the value of their fixed seating products. SERIES unique seating design allows churches to increase seat capacity by 20% over normal pews, while allowing much greater traffic flow.

The VERA's biomorphic, non-intrusive design incorporates classic and contemporary influences that make it compatible with any church environment. Like the human body, the body of the VERA has no straight lines, which brings visual and tactile harmony between the chair and its user.

### Stackable Chairs for Churches

SERIES Seating offers stackable and loose church chair options designed to harmonize with our fixed theater seating models.

Boasting a design more sophisticated than industry counterparts, the VERA stacker serves as a companion to our fixed VERA Auditorium Seat. It cleanly handles overflow seating challenges in the worship area along with seating in multifunctional spaces.

The CELEBRATION is one of the industry's first truly streamlined, upholstered church chairs. Like the VERA stacker, the CELEBRATION makes an ideal companion chair to a fixed auditorium seat, creating visual harmony in permanent worship areas and multifunctional spaces.

### Church Pews

Though SERIES Seating brought space efficiency to the church market with its church theater seats, we understand the familiar appeal of traditional church pews in the worship environment. Our desire for a pew with the efficiency of a theater seat resulted in the Pew Optima, the only pew product that offers self-lifting seats without the restriction of arm dividers.

Like with all our other seating, the Pew Optima also increases seat capacity by 20% over conventional church pews. This combination of form and function melds together traditional church seating while taking less space and increasing traffic flow.

## CHURCH GALLERY PAGE

Here's a look at just a few of the hundreds of ministries we've served and how they've used SERIES church seating. Designed to meet the highest standards of top-tier performing arts venues, our seating is ideal for any worship environment. For a more in-depth tour of SERIES Seating in a variety of markets, [click here to view our company portfolio](#). If you would like additional details for a particular project, [click here to contact us](#).

## PORTFOLIO PAGE

SERIES Seating has had the privilege of serving a variety of seating markets across the world. This portfolio is just a sample of multiple clients in the markets of performing arts seating, worship seating, educational seating, cinema seating, and stadium seating. We hope this tour highlights the streamlined efficiency that SERIES Seating has to offer.

## SERVICES PAGE

### Church Seating

SERIES Seating is a full service provider, professionally staffed to partner with you on a successful seating purchase. No need to go at it alone at any stage of the process - we're here to help you design a layout, select the ideal product for you, coordinate installation, and handle any of your questions. We like to think of our customers as long-term relationships and partners, and with our dedication towards excellent service, we hope you'll feel that way as well.

### Layout Design

No other company is more committed to proper space stewardship. Our CAD (Computer Aided Design) department will provide a seat count layout and detailed pre-production drawings based on your initial footprint sketch and field measurements. Thanks to the unique designs of SERIES Seating products, our layout can adapt to any code restrictions and guarantee more seats per square ft. of building than any other industry auditorium seat - all without sacrificing abundant traffic flow.

### Project Coordination

SERIES Seating gives you the tools and assistance to ensure your seating is delivered on time. Your project's assigned manager will coordinate and verify the readiness of your building before shipping, delivering essential information and securing client approvals by a time line of dates. Meanwhile, clients can access an on-line project status report, updated in real-time, to check on the status of their order, with helpful details on each stage of production, product delivery, and installation.

## Delivery and Installation

With the help of SERIES Seating USA, our own seating installation company, we'll install your seating as soon as it arrives at the site, typically within a two-hour time frame. The day before the product arrives, our crew will also come in to prepare the site and establish layout before installation. Through SERIES Seating USA, we can install quickly, maximize quality control, and promptly follow up with you.

## Upholstery

SERIES Seating can also maintain your seating after installation with reupholster in a variety of seating styles. No matter what seating you have - theater seats, pews, stackable chairs, or any combination of these - we'll help assure visual harmony at a fraction of the cost for new seating. It doesn't matter if your seating is old or new - with SERIES Seating, you're covered through each stage of your seating's history.

## ABOUT US PAGE

SERIES Seating was established in Miami, Florida in 1999 as an environmentally-friendly seating provider, even before going green was fashionable. Since then it's grown to be the nation's leader in worship seating thanks to our focus on space stewardship and a drive for continual innovation. It's this innovation that allows SERIES church seating to maximize floor space, making efficient use of a footprint for more seating without sacrificing comfort. Plus, it's produced with minimal waste and packaged in boxes made from recycled materials, manufactured in a factory with a natural climate control system. It just goes to show that our green-focused production can still make quality seating for every need.

No wonder our clients tend to agree. Only through their word of mouth at the quality of our seating and installation service has SERIES Seating been able to grow to where it stands today. Don't just take our word for it. Explore the site and see what SERIES Seating can do for your building project today.
