

DRIP IRRIGATION SYSTEMS

Not all properties are created equal. What if you want to install an irrigation system for a smaller area, like your vegetable garden, or a high-rise or penthouse apartment? A traditional irrigation system won't do. Even if it did, the inevitable sprays and mists would create a disturbance when it hits walls and pedestrians due to the smaller space. What can be done? Sometimes you need a smaller solution for a smaller problem. Fortunately, even though the drip irrigation systems provided by Green Lawn Sprinklers Inc. are definitely small enough for your little area, they're nowhere near small solutions. In fact, drip irrigation systems can be just as efficient as a traditional sprinkler system – or even more.

The name of the game is focused effectiveness. Drip irrigation only applies water where it's needed in comparison to wider-spraying sprinkler systems. In a zone like a garden, this means applying water directly to plant roots, where the water has a chance to soak into the soil without evaporating. This means that your plants are primed for green, optimal growth, since they can immediately access water via their roots. There's another bonus to this method – drip irrigation uses far less water than other sprinkler systems for the same amount of impact. Healthy plants for even less money. What could be better?

Here's something better. Even though the system is smaller, you still get access to features like valve control, automatic water scheduling, or digital controlling, just like the bigger sprinkler systems. That's standard on all the irrigation systems provided by Green Lawn Sprinklers Inc.. And drip sprinkler heads are so small that they're hard to notice at first glance. Nothing bulky here – just a system that minimizes visual distraction in your garden and focuses on helping your plants grow strong.

If you're looking for a sprinkler system at a fraction of the cost, look no further. Get in touch with Green Lawn Sprinklers Inc. today and we'll set you up with something just as powerful as the big boys.
