

# TECNOLOGÍA

MATERIAL: Aluminio  
 Espesor cte: 2 mm  
 PROCESOS: Corte waterjet, punzonado, curvado y granallado.

# PLANOS

Escala: 1:1

Escala: 1:2

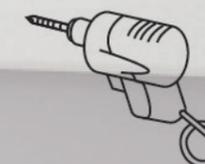

# INSTALACIÓN

1

Marcar la posición de los agujeros

2

Realizar agujeros con una mecha de diametro 6mm

3

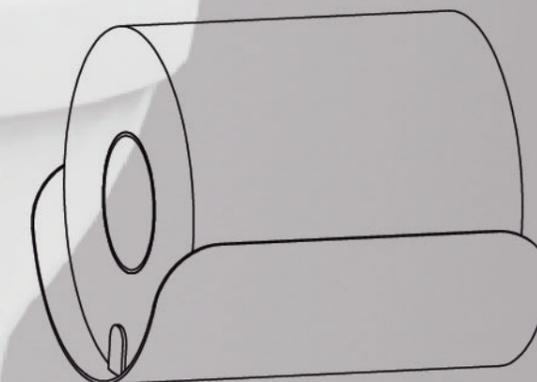

Colocar 2 tarugos plásticos

4

Ubicar el portarollo y atornillarlo

5

Alumina
