

# Not Better After Your Pain Block?

Pain Medication  
Not Helping?

Accurate Diagnoses

Through Precision Testing

Southwest Pain Group prides itself on being a practice that delivers personalized treatment at every appointment by taking the time to accurately diagnose and treat the source of your pain.

Dr. Robert Bulger has nearly 30 years experience as a Board-Certified, Fellowship-Trained anesthesiologist and as a self-professed "pain detective", using a number of revolutionary techniques, including: metabolic DNA testing, ultrasound guided blocks, and pain-mapping, a method he has utilized for over 20 years.

Make an appointment today to Put Your Pain in The Past and experience Dr. Bulger's 3 easy steps to living a pain-free life:

- 1. TIME** - Our providers are all ABMS Board-Certified and Fellowship Trained. They have invested years in their education, training and research which allows them the luxury of taking ample time to spend compassionately listening and evaluating each patient.
- 2. TESTING** - We now offer revolutionary metabolic DNA testing which helps our providers gauge whether or not your metabolism is working with or against your prescribed pain medication.
- 3. TARGET** - Pain affects us all differently and there are a myriad of different pain generators. Our providers, or pain detectives, will map and identify the correct root of your pain and plan an effective and targeted treatment plan tailored just for you.
