

CRUSHING RECORDS. AND PERCEPTIONS.

In 2009, CAF received a grant request from Blake Leeper who was born missing both legs below the knee. **His dream? To run in the Paralympics.** CAF provided Blake with his first pair of Össur running feet and taught him how to run at a mobility clinic. Three years later, he won two medals at the London Paralympic Games.

Sports provide the foundation for success in life. All too often, however, challenged athletes don't make it to the starting line due to a lack of funding. Over the past two decades, the Challenged Athletes Foundation® has provided grants for equipment, competition and training to more than 8,200 athletes worldwide, and support, inspiration and mentoring to tens of thousands more. We're changing lives, one athlete at a time.
