

Executive Summary:

Do you like to relax at the end of the day? Howabout, stretching out on your couch or chair and putting your feet up? Me too! But, while I love resting my legs on my coffee table, I grew tired of having my legs fall asleep from the lack of circulation. That is why I created multirest!

multirest is a multifunctional contoured grip-bottomed cushion. It is ergonomically designed to provide therapeutic support to the legs in order to prevent loss of feeling and those annoying pins and needles. The grippy bottom prevents it from moving around on the table everytime you move. multirest is also a portable seat, back cushion, pillow...etc. It's multifunctional!
