

Motorola WiMAX

MUCH FASTER THAN THE AVERAGE FAST

Super-charged and super-fast wireless mobile broadband networks that keep people seamlessly connected. Motorola WiMAX networks have expanded capabilities to enable you to serve your heaviest applications – Internet, video and voice – more quickly. They also provide extended coverage to large metropolitan areas or new markets previously beyond reach. It's part of the 4G broadband portfolio that helps you deliver high-performing and cost-effective wireless broadband solutions virtually anywhere. It's just another way Motorola puts Media Mobility in the palm of your hand. HELLOMOTO™
