

Don't Surrender to Age, Become Ajeless

By Allie Chase

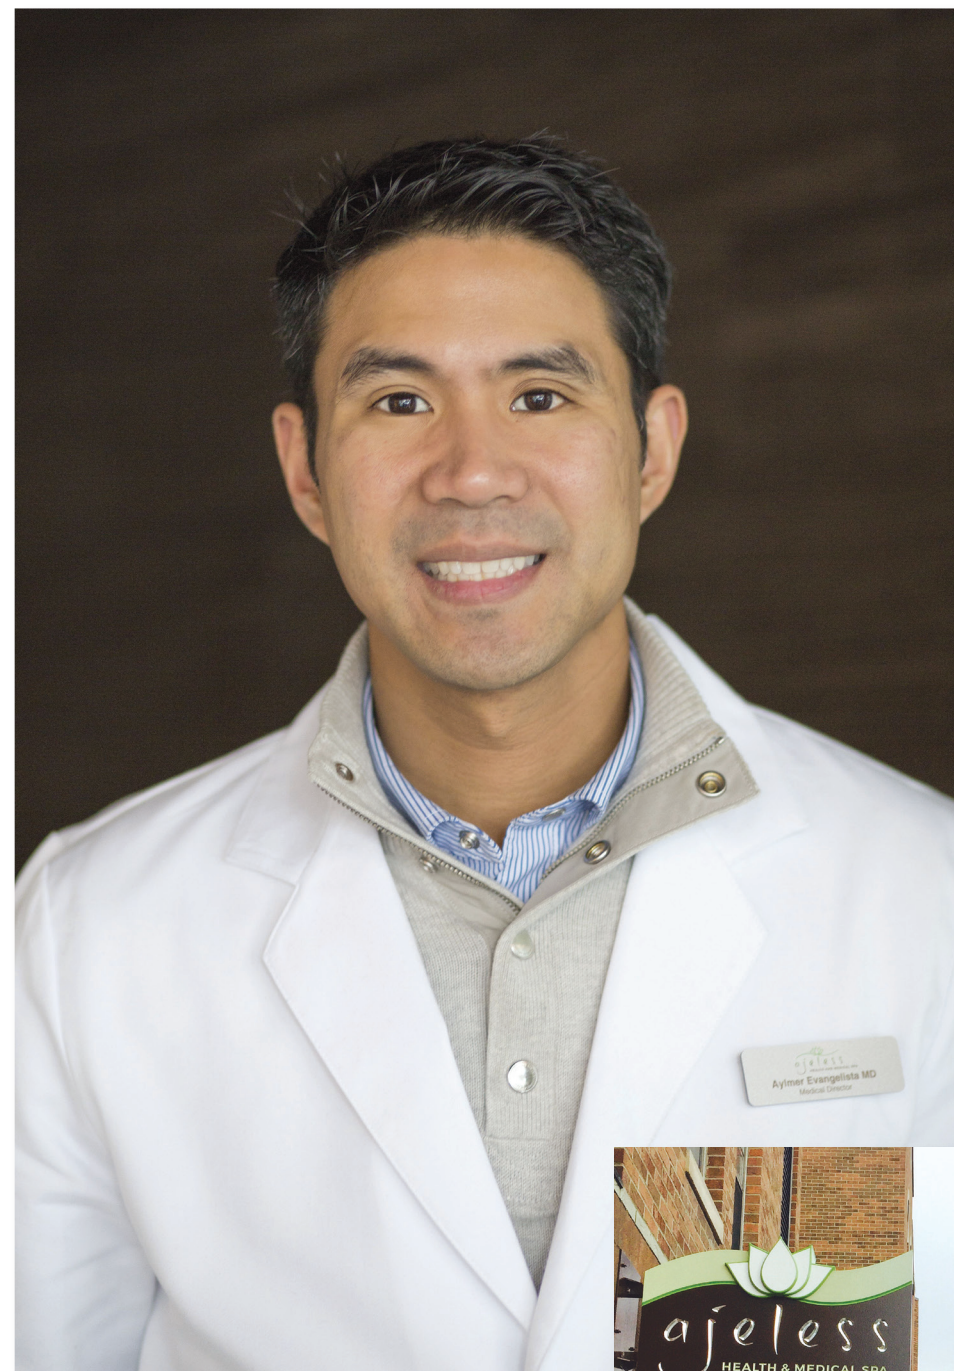

If you were given the opportunity, how would you turn back time?

Looking back, you wish you had worn your sunscreen because sunspots and wrinkles have become the center point of your face. The alarm clock rings at the same time each morning, yet you feel less energetic and more lethargic with each passing day. No matter how many times you go to the gym, the cellulite on your legs never seems to disappear.

Set your concerns aside and rest easy knowing the solution is closer and more achievable than ever. Ajeless, your one-stop health and medical spa, offers individualized solutions to achieve younger-looking skin and improve quality of life. From laser rejuvenation to hormone optimization, board-certified physicians Dr. Aylmer Evangelista and his wife, Dr. Jennifer Rhee-Evangelista, work with patients to enhance daily life.

Ajeless, crafted from a combination of the doctors' first and last names, outlines the goal for each patient in a simple yet timeless name. The founders of Ajeless Health and Medical Spa, Dr. Aylmer and Dr. Jennifer, have made it their objective to optimize patient health while maintaining your best self. They offer patients a fountain of knowledge along with the newest advances in technology and techniques based upon artistry. Drs. Aylmer and Jennifer simply achieve what others cannot. Focusing on preventative and proactive measures, Ajeless pursues result-oriented treatments of the face and body by using a multi-faceted approach, treating the root of the problem to find a solution.

Although Ajeless provides health and medical solutions across the board, Dr. Aylmer is particularly excited about his rapid medical weight loss program and hormone replacement therapy treatments. His ability to improve and increase

testosterone levels in men and women, as well as estrogen levels in women, elicits a range of positive side effects that keep his patients coming back for more.

"Optimizing hormone levels will not only make you look and feel better, but will also help with preventing age related diseases such as dementia, osteoporosis, diabetes, arthritis and heart disease," Dr. Aylmer says. "Often combined with weight loss, hormone replacement therapy cannot only rejuvenate a person, but can also lower your risk for cancer as well as other diseases and may help improve chronic health conditions."

Dr. Aylmer's experience and results speak for themselves, and his patients are the proof! By changing lives one day at a time, he has truly transformed the health and medical spa game.

Ajeless is redefining health and wellness by allowing patients to age healthier and live happier. The welcoming environment appeals to anyone and everyone, regardless of age or gender. Patients are provided with a one-on-one consultation to discuss a multitude of options based on specific wants and

needs, and Ajeless offers something for everyone. They can eliminate scars, stretchmarks, leg veins and unwanted hair on the body. From treating acne and age spots to custom facials, wrinkle reduction, cellulite removal and body contouring, the options are endless. Their integrated approach recognizes that success is achieved through knowledge, quality and excellence.

Drs. Aylmer and Jennifer Evangelista are altering the way patients view and use Health and Medical Spas by creating an entirely new experience based around artistry and expertise. Ajeless provides patients with more than good looks and beautiful bodies; they provide the necessary tools to help patients age optimally and feel more youthful with each passing year. With Ajeless as your guide, your future is looking brighter, younger and more energetic. By educating, assisting and maintaining a higher quality of life, patients will finally have the opportunity to redefine age and turn back the clock.

For more information, visit www.ajeless.com or reach them at their Northville location by calling (248) 465-8000. Drs. Evangelista and their team at Ajeless will help you feel "ajeless" both inside and out.
