

# Ingram book shelf

The main feature of the book shelf is the sliding book ends positioned in the centre of the piece. It allows for all quantities of books or personal items to be held on both shelves, depending if you have a lot of things to store, or a minimal of possessions.

The Ingram book shelf carries the values of a traditional piece of furniture but integrates a modern furniture twist.

Manufactured from many different types of wood to exploit the rich texture and tones of hardwoods or just one type, the Ingram resembles an aesthetic, natural piece of furniture.
