

URBAN TAXI INTERIOR

Individual Project

Duration of 3 weeks

The innovation of taxi follows the evolution of cars. From the typical designs and technologies used for the old days, the development of taxi has progressed to be of more futuristic shapes, more modern technologies and more user-oriented vehicle. Public transportation has played a major role in the development and viability of urban areas. Designers have to explore on how to meet the society's transportation needs as they enter a new century.
