

P Shox

The P Shox have two points in the shoe that will absorb shock based on the main areas that your foot inncounters the most preasure. The shoe also includes a strap that can be put on if needed to secure the foot.

Strap

The strap is an added feature that is easy to put on the shoe and take off when needed. The purpose of this strap is to tighten the shoe so the user would be able to perform activities such as running.

How The System Works
