## City of Trenčín

Trenčín is located 190km NE from Vienna and 120km NE from Slovak capital Bratislava. It is one of the most beautiful cities with a large amount of historical and cultural monuments.

Trenčín is very easily accessible by bus and car (motorway), by train (main Slovak rail route), or by plane (nearest public airport is Bratislava or Vienna). Trenčín is in vicinity of the Czech Republic, Poland, Hungary and Austria. In 2004 BAŽANT POHODA took place at the Trenčín airport for the first time. The airport is conveniently located within the city borders. It is situated in picturesque valley of the river Váh, surrounded by mountains of Považský Inovec, Biele Karpaty and Strážovské Vrchy. The surface of the venue is optimally divided between the grass and concrete areas. This eliminates traditionally negative aspects of open air events such as mud in case of rain, or dust in case of draught. The airport can easily facilitate festivals infrastructure (stages, food and drink zones, hygienic zones) as well as the compound for visitors (parking lot, camping area). Proximity of the city centre which has been strengthened by the shuttle service is another advantage of this place. This generous space emphasizes traditional festival values (tolerance and communication) and increases the feeling of freedom and liberty.
