AIM

The main aim of the project is to understand and design interiors for an old age home.

CONCEPTS

cater for the physiological and psychological needs of the elderly.
To provide good living environments to the old people, creating a friendly and family like atmosphere where they can share their joys, sorrows and live happily
To make the space more comfortable for the users.
To design a home with peace, tranquil and pollution free surroundings with all the basic amenities required for the comfortable stay.

OBJECTIVE

To understand the design of interiors in a home for the elderly where all their needs are taken care of and they are provided with all medical facilities in care of the emergency.
objective to understand of the problems of the elderly people as users and designing according to their needs.
To study the recreational facilities for the elderly.

NEED OF STUDY

As it is a place where in all kinds of people come, so we have to see that the design is equally acknowledged by everyone. accordingly we have to study and design. enhancing the thesis with a more profound sense of the aesthetic and technical issues. the design continues to assemble and translate elements of interior design into an integrated whole, and the interior finishes and furnishings.

SCOPE

Design scope for the interiors of the old age home includes:
color scheme.
Furniture mainly on seating & beds
Lightings, coloring and psychology.
The project mainly focuses on the design of the interiors where elderly can live a comfortable life in a
Well organized manner so as to socialize in a secure environment.
