

- » Bowed shape allows base to fit securely in a standard car seat while giving pet the space to turn 360° within the carrier
- » Paw print cutouts allow 360° visibility and ventilation; size reduced for pet's safety
- » Turn-dial latches allow front door to easily be opened from either side
- » Seatbelt hooks moved to rear end of carrier after lo-fi prototyping revealed that most seatbelts would not reach the front
