Hello,

I am a product design graduate from the Loughborough Design School who, having already enjoyed a years experience in the industry, is now looking to continue their journey in design. I am ambitious, adaptable and naturally creative, with strong technical ability in CAD. Outside of working hours, I undertake freelance graphic design projects as well as coaching American Football for under 16's as a co-ordinator. This has provided me with a good work ethic and ample experience as working as an individual, as part of a team and also managing people.
