

RESTAURANT & BAR

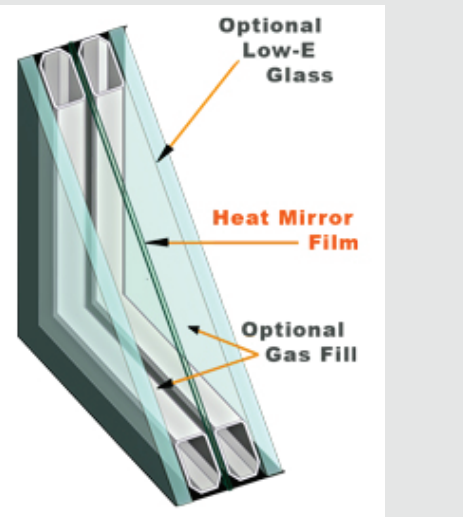

PIER 48 COMMUNITY COMPLEX

Pine wood is hard wood flooring that can bring warm and distinctive beauty to restaurant and give more spacious feel to space . Also it certified by FSC.

Low E glass reflects internal heat back into the space using this type of glass it can reduce heat loss.

Recycle glass is a sustainable, fully recyclable material which provides great environmental benefits such as contributing to mitigating climate change and saving precious natural resources. It is also highly appreciated in many applications for its inert nature and its contributions to safeguarding people's health and well being.
