

History

- In 1927 Airstream founder Wallace “Wally” Merle Byam published an article, “How to Build a Trailer for One Hundred Dollars.” He sold 15,000 copies at \$1 each, and officially started Airstream in 1931.
- Wally Byam created the unique aluminum trailer in response to his wife’s refusal to go camping without a kitchen.
- Airstream is the oldest manufacturer of recreational vehicles in the United States and is the most recognized aluminum travel trailer.
- When Airstream began, there were less than 48 trailer manufacturers. Five years later, nearly 400 companies squared off against each other, of those 400 companies, only Airstream remains.

Why Airstream?

There’s nothing better than traveling with your Airstream on a blustery day and smiling inside – because you know the wind will flow around its aerodynamic shape. Its design offers up to 20% more towing efficiency than standard box trailers. Aluminum skins and frames give Airstream its rigidity and durability. A rubber torsion axle and wheels with under mounted holding tanks create a low center of gravity. Its exceptional rigidity and low, rounded shape creates increased towing efficiency, stability and driving safety. Airstreams are handcrafted by Americans to be handed down generation to generation. In fact, nearly 70% of all Airstreams ever built are still on the road, meaning impressive resale value for you.

Wally's Creed

"In the heart of these words is an entire life's dream. To those of you who find in the promise of these words your promise, I bequeath this creed my dream belongs to you."

- To place the great wide world at your doorstep for you who yearn to travel with all the comforts of home.
- To provide a more satisfying, meaningful way of travel that offers complete travel independence, wherever and whenever you choose to go or stay.
- To open a whole world of new experiences...a new dimension in enjoyment where travel adventure and good fellowship are your constant companions.
- To lead caravans wherever the four winds blow...over twinkling boulevards, across trackless deserts...to the traveled and untraveled corners of the earth.

Fun Facts

- It takes about 280 hours to build an average Airstream.
- Every Airstream spends 40 minutes under 100 pounds per square inch of water pressure to ensure that it is water-tight.
- By the 75th Anniversary of Airstream in 2006, almost 60 to 70 percent of all Airstreams ever built were still on the road.
- For decades, NASA has used Airstreams to transport astronauts to launch pads.
- Several specially-built Airstream trailers are strapped down inside military cargo planes to comfortably transport American officials around the world.
- A 1960 Airstream Bambi Travel Trailer is part of the permanent collection of New York's Museum of Modern Art for excellence in style and design.
