Speed Cushions

Great Option for Roads Frequent by Emergency Vehicles or Buses

- Update your streets to allow faster access for emergency vehicles
- Effective traffic calming alternative to speed humps
- Larger emergency vehicles can straddle without reducing speed
- Recycled rubber construction conforms to uneven surfaces, maintains shape over time and does not contract with heat or vehicle pressure like concrete or asphalt
- Slip-resistant surface with molded-in tread pattern and yellow arrows for increased visibility
- Speed cushion includes six modular sections and installation hardware
- Easy installation and removal for storage or relocation

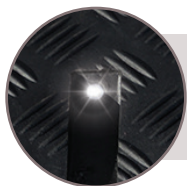

In-Stock
