### Genius, Innovation, Style!

Created to meet the needs of both parents and little ones, newborn to 3 years, the Dilli Dalli pediatric eyewear collection offers unsurpassed durability, a comfortable fit and adorable style. Revolutionizing the world of pediatric eyewear through its innovative IntelliFlex™ technology, this advanced collection delivers both fashion and function.

Designed with the ability to flex both vertically and horizontally, the IntelliFlex multi-action spring hinge can “spring” back to its original adjustment, offering unique flexibility and greater durability to Dilli Dalli frames. The result is dependable, functional eyewear with a minimized need for replacement.
