

## Welcome!

 With this training and overview, you'll be set to go out and serve as an advocate for USGBC-Illinois. You'll be communicating its commitment to a prosperous and sustainable future through cost-efficient and energysaving green buildings---a market transformation.

 The State and Local Government (SLGC) Speaker's Bureau PowerPoint modules are your public speaking tools for municipal and state government outreach. They were developed so you have ready-made programs to help your audience better understand who we (USGBC) are; what we do; and how we can help a municipality foster sustainability in its building and planning practices.

- Where can I find them?
  - Our Yammer State and Local Government Committee private page (under "Files" tab). You can join or we can add you.
- Five Available Presentations
  - Basics of Green and Sustainable Buildings
  - Basics of LEED Rating System
  - Green Codes
  - Grants & Incentives
  - Green Building Policies and Legislation

#### How to use them

- Outreach is responsible for managing the ppts, keeping them up to date.
  That said, Outreach members will ask other SLGC subcommittees and SLGC members for help in updating certain information.
- Presentations are downloadable, allowing for editing.
- Why edit? To tailor for your audience.
- Never re-upload your presentation to the Yammer site. You may delete the master!
- Chapter staff can post your presentation on the SLGC homepage @ www.usgbc-illinois for attendees.

 PowerPoint "notes" capability helps you as the presenter (some notes already provided).
 Helps you avoid looking back at the screen and simply reading the slide.

- Many of the presentations feature case studies, easy to read graphics, and color!
- All are branded with a consistent look that identifies USGBC-Illinois.
- Some run 31 slides, others as few as 11.

## **Presentation Tips**

- PowerPoint is not a teleprompter!
- Audience is there listening to you; don't recite what they can read.
- Use the slides as reference. The notes section is only visible to you on a laptop. Use those notes to prompt points you want to make or information you'd like to share on the slide.

## **Presentation Tips**

- Practice your presentation; build familiarity with what you are presenting. You will be less nervous and more confident.
- Make eye contact; hold a conversation---much more engaging!
- Have a glass of water handy for dry throat.
- Speak clearly and project if no microphone. Ask audience in the back if they can hear you.
- Smile!

# Other Event Prep: Never leaving anything to chance

- Inquire if host will be providing projector. If not, ask your branch.
- Ask what the host might provide. Do you have a laptop? If not, ask host, branch.
- You'll need the right cables and a power cord. Ask what the presentation will be projected on; maybe inquire about room details---seating & lighting.
- If "they" provide a laptop, ask what version of Word so your ppt is compatible. Bring your presentation on a thumbdrive; have a backup as well. Check at home that they work.
- Print out your presentation just in case.
- See how early you can show up to set up.

• Let's Look at the Presentations!

# Questions?
