

NEW FEATURES

Location of LED lights

Built in **Lights** are incorporated in the Boom to enhance the atmosphere

Boom Tune takes all the songs from the Live List and generates recommended songs and plays them all

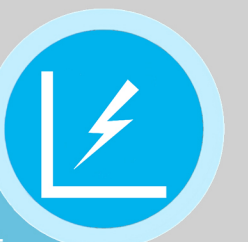

Boom Finder

senses other Booms in the area and creates that connection, hoping to bring the Booms together

To turn on Boom Finder you press the cache and plus buttons at the same time

Live List is a playlist which can gather and store the songs you have cached through the boom, sharing the experience again

The **Cache** button recognises the song then adds it from Spotify to the Live List
