

dyson zephyr

HAIR DRYER

TOURMALINE COAT

The internal heating components are **tourmaline ionized** coated core controls that **heat output** and **reduces frizz**

REDUCED SOUND

Thin **auditory felt** lining the inside core of the main barrel **suppresses** harsh sound transmission created by the motor

HEATING ELEMENT

Unlike traditional dryers, this **heating** component and motor now resides in **central** body to **remove risk of burning**

ADJUST AIR INLET

Vent location is repositioned into the **lower** region of the dryer's handle, **preventing** them from **pulling** hair
