

# Chip-Shield

Gaming Partners International is a leader in the industry when it comes to developing new technologies and advanced product innovations. While we continue to research and develop the latest in table game products and solutions to enhance casino profitability and image, we also keep in mind the well being of your casino employees and customers. As a result, we are excited to offer our latest in currency technology, Chip-Shield—a new and innovative anti-bacterial and anti-fungal nanotechnology.

## KEY BENEFITS

- 99.9% effective in killing the bacteria and fungi that are responsible many common ailments including:
  - Ear Infections
  - Sinus Inflammation
  - Staph Skin Infections
  - E. Coli Enteritis
- Additional level of protection for guests and employees
- Does not impact chip manufacturing process
- Helps prevent spread of bacteriums and fungus growth

## What is Chip-Shield?

Chip-Shield is incorporated directly into the raw materials used in our chip manufacturing. Chip-Shield contains both organic and inorganic agents that target bacteria and fungi and both kills and inhibits their growth. And since it is a part of the chip material, it does not wear off or lose its efficacy.

Adding Chip-Shield is ideal for casinos and gaming resorts where there is a high level of player and staff contact with the chips. With visitors traveling from all over the world, it provides your guests and employees an additional safeguard against exposure and spread to a number of common illnesses and infections that are spread by everyday direct contact. An added benefit is that it also aids in reducing lost labor hours due to everyday illnesses thereby improving staff productivity.

## Contact Us

Our international sales staff is available to help answer any questions you may have. To learn more about Chip-Shield, contact your local GPI sales representative today.
