

PAULSON CHIPS

Gaming Partners International

TRADITION + INNOVATION

In the early 1960's, Gaming Partners International introduced its Paulson clay composite chips to Las Vegas casinos. Since then, the American-style chip brand has been regarded as the U.S. standard for secure and economical casino currency and is renowned worldwide as the poker chip of choice. With their iconic look, feel, and sound, the popularity and reliability of Paulson chips have continued to be the industry standard for compression molded chips.

Paulson casino chips are compression molded clay composite chips that offer intricate graphic custom inlay options and molds. GPI's continued commitment to developing innovative technologies in design and manufacturing has resulted in a more sophisticated and unprecedented selection of security features that provide increased levels of counterfeit deterrence.

//TRADITION + INNOVATION

WHY CHOOSE PAULSON CHIPS

Tradition: Paulson chips are widely recognized by dealers and players for their unique feel, sound, and easy handling and have been the traditional U.S. casino chip of choice.

Design Options: With a wide assortment of colors, inlay options, and edge spots, and the option to have the outer mold stamped with either the traditional Top Hat and Cane pattern or a custom design, casinos can create their own exclusive, unique chip.

Security: A wide selection of security features can be incorporated into the aesthetic design and manufacturing process of the chip providing increased levels of counterfeit deterrence and extensive authentication options.

Cost-Effective: Paulson chips are also an affordable and economical option, making them an ideal choice for promoting special events, marketing campaigns, property attractions, venues, and holidays.

PAULSON CHIPS

STANDARD CHIP / HOT STAMPED / ROULETTE

We offer an extensive selection of Paulson gaming chips to choose from. Each chip style is available with a variety of design options that can be combined with an unmatched selection of security features. Additional information on our overt and covert security features can be found under the Security Features section of this booklet.

//PAULSON CHIPS

FEATURED ABOVE:

- Chip Mold Style 6
- Standard Top Hat & Cane Mold
- Giant Inlay
- Four-Color Process Printing

PAULSON STANDARD CHIPS

The original Paulson chip is regarded as the preferred and established American standard for clay composite casino currency, and GPI has revolutionized this traditional chip by adding the ability to include See-Through Inserts. This new design element is a transparent shape that is inserted into the chip's mold, which serves as an aesthetic visual component that offers an additional level of counterfeit deterrence, and an excellent way to differentiate your low and high denomination chips.

KEY FEATURES AND BENEFITS:

- Paulson chips offer a wide selection of base chip and edge spot patterns and colors
- With a four-color printing process, inlays are available in seven sizes and can incorporate full-color images into the design
- Outer mold can be customized to include text or logo
- A wide range of overt and covert security features can be integrated into the manufacturing and design of the chip
- The chip is available in four sizes ranging from 39mm to 50mm

//PAULSON CHIPS

PAULSON HOT STAMPED CHIPS

The Paulson hot stamped chip is an excellent and economical choice for lower denomination chips. They are available in a single solid color with a foil hot stamp. Additionally, the customized die can include text and a logo.

KEY FEATURES AND BENEFITS:

- Chip is available in 78 chip colors
- Includes a standard gold foil hot stamp or the option to choose other colors
- Outer mold can be customized to include text or logo

FEATURED ABOVE:

- Standard Top Hat & Cane Mold
- Foil Hot Stamp

//PAULSON CHIPS

FEATURED ABOVE:

- Custom outer mold
- Traditional Grand Inlay
- Paulson Top Hat & Cane central logo
- Four-Color Process Printing

PAULSON ROULETTE CHIPS

Paulson roulette chips can be hot stamped or produced with a custom inlay.

KEY FEATURES AND BENEFITS:

- Chip is available in 78 chip colors
- Choose between hot stamped central design or traditional inlay that can be printed with one of 30 standard designs
- Outer mold can be customized to include text or logo

As the gaming industry's leading provider of casino chips, plaques, and jetons, we know that one of your casino's most valuable assets is your money, and that's why we make securing it our top priority.

//SECURITY FEATURES

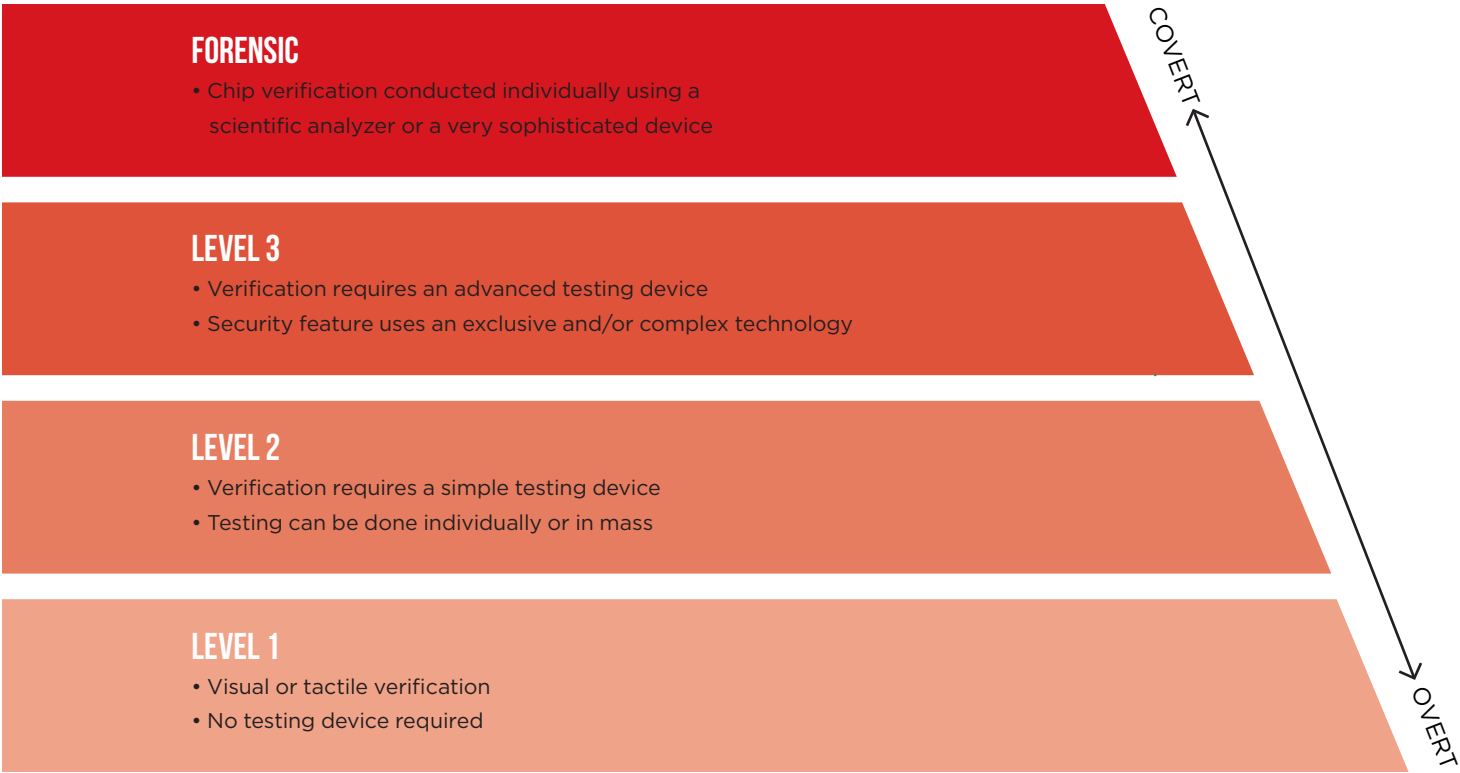

UNDERSTANDING WHAT MAKES YOUR CASINO CURRENCY SECURE

For optimum protection, a gaming chip should incorporate a balanced mix of overt and covert security features from each security level. Overt security features can be authenticated with the naked eye, while covert security features require a device to authenticate. The complexity of each feature determines its level of counterfeit deterrence, as does whether or not its availability is exclusive or restricted.

GPI is a member of the CIB (Counterfeit Intelligence Bureau) and works closely with experts and partners highly involved in brand protection and the currency industry. This enables us to offer the gaming industry's widest range of currency security features, and most of these features are available for use in each of our chip brands. Our helpful sales staff will work with you to determine the best mix for each of your currency denominations. To learn more, contact your local GPI sales representative.

//SECURITY FEATURES

A LAYERED APPROACH TO CURRENCY PROTECTION

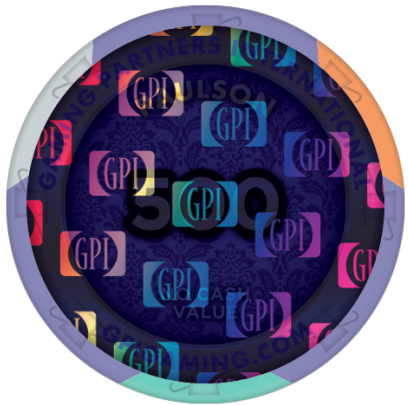

//SECURITY FEATURES

D-TECT

- FEATURES:**
- Increases safeguards against internal theft
 - Detected with installed gates or hand-held paddle
 - Compatible for use with RFID

4C-UV

- FEATURES:**
- 4C-UV incorporates a unique full-color photograph, image or pattern into your chip inlays for quick currency authentication at the table with a UV detector

UV-ELP

- FEATURES:**
- UV pigments and inks can be added to the chip or inlay material during the manufacturing process and are revealed with a UV detector

//SECURITY FEATURES

LASERTRACK™

- FEATURES:
- Specially developed laser inks are mixed with the printing inks or chip materials and are revealed as green under an invisible laser beam sent by a special device

ALPHA DOT

- FEATURES:
- To the naked eye it appears as a small dot
 - This feature is incorporated into the inlay and reveals microscopic text when authenticated with a magnifying device

RFID

- FEATURES:
- When RFID microchips are installed in a gaming chip, they offer a secure way to track and record the chip's movement
 - Because each chip has a unique tag that is encoded with the chip's monetary value, it can be instantly identified and validated when it comes in contact with an RFID reader

//SECURITY FEATURES

CUSTOM MOLD

- FEATURES:
- The famous Paulson Top Hat and Cane design can be debossed on the edge of the chip to confirm authenticity, or a customized mold can be created with your casino logo or other design

SERIALIZATION

- FEATURES:
- This process assigns a unique number on the inlay of each chip
