

GPI and MAXTime 4H

Gaming Partners International has been producing its high-quality line of casino furniture for over 40 years. Our gaming tables and pit podiums are designed to meet each casino's operational standards and individual design preferences. Each custom piece is manufactured to exact customer specifications. We offer a wide array of design and finish options as well as all the necessary table game accessories to make your table game complete.

With the goal to continually provide gaming solutions to help streamline your casino's operations, GPI is proud to announce that it has partnered with Tech Art and now offers Tech Art's MAXTime 4H chip trays. Fully functional on shoe or handheld games, the MAXTime 4H eliminates time wasted dealing out hits, splits, double down cards, and extra shuffles which occur when the dealer does not receive or check the hole card. The MAXTime 4H incorporates Tech Art's reader in the construction of the chip tray and allows casinos to deal Las Vegas style blackjack while helping supplement casino revenues by increasing the number of hands dealt by the dealer per hour.

KEY BENEFITS

- 
- Chip tray available for Blackjack and specialty games
 - Unit is always in correct position for ultimate game security
 - Dealer friendly placement maximizes game speed
