TOMTOM
REMOTE CONTROL

TOMTOM
BARFLY MOUNT

GREAT SHOTS
Through using the remote control when it Shoot frames from multiple angles by mounting the camera forward or backward. The single handle bar mount can be quickly and easily secured too, without the use of tools. With thanks to tube diameter (7/8" - 1.25") memory, a fast installation is made even more possible when re-installed on the same tube.

EASY SWITCHING
The seamless mounting enables you to quickly change around the camera position.

FLEXIBLE POSITIONING
The TomTom handle bar mount has the versatility to mount your action camera on the handle bar or seat post.

TOMTOM
REMOTE CONTROL

EASY TAGGING
Tag your highlights when your camera is mounted out-of-reach. Control and monitor your camera status when it is mounted out of reach or sight. The remote control button and LED functionally mirrors the two buttons and LEDs on the camera.

CAMERA CONTROL
Control your camera when you can't reach it, for example, when it's on the handle bars or the steering wheel.

SAFE OPERATION
Control your camera when you can't reach it, for example, when it's on the handle bars or the steering wheel.
