- Medicare and Medicaid enrollment
- Ownership and network size

# What it feels like to be first.

Marketing to the right person at HMOs, PPOs and POSs is just half your mission.

The key is getting to them before your competition.

With Dorland's **Health Plans Database**, you'll find continuously updated, accurate information on more than 1500 health plans, *including new organizations you won't find in other lists.*

We take you to the top-level decision-makers, listing contact information for thousands of medical directors, CIOs, and provider contractors – at headquarters and regional offices, not just sales offices or provider sites.

Order the full U.S. or selected states – on diskette, mailing list, or online at [Healthplansearch.com](http://Healthplansearch.com). Call **800-784-2332** today – and see what happens when you get to your target market first.
