

## MRO Excellence Has a Price Tag. We Help You Find the Lowest One.

In industrial and institutional MRO environments, there are no compromises. You need the highest quality, broadest range of electrical parts available at the lowest possible cost. The ability to get all of this from one source is now possible.

For nearly a century, Royal Electric Supply has been the supplier of choice for industries like yours. Our standards are as uncompromising as your own. Because we have such a broad offering of electrical supplies and expertise, you will never need to rely on multiple vendors again.

Companies that work with Royal Electric get the full benefit of our personalized service, including:

### **Location of hard-to-find parts**

With just a picture and the nameplate information for your device, your Electrical Advisor will find the part you need.

### **Dedicated inventory**

We will visit your facility and help you determine appropriate inventory levels for your critical items. If you do not have the space or budget for replacements at your warehouse, consider having your "A" items stocked at Royal Electric.

### **Experienced technical assistance**

We have been in business for over 90 years. Your Electrical Advisor is trained to listen and understand the unique requirements that you expect of your vendor partners.

### **Cost savings through innovation**

If there is a more cost-effective way to accomplish your goals, your Electrical Advisor will find it.

### **24/7 emergency service**

We are available when your equipment goes down. And we have the industry contacts to get what you need, when you need it. We understand that “now” means Now.

### **Royal Electric offers a wide variety of electrical products and services from the highest quality manufacturers, including:**

- Lighting & lighting surveys
- Energy efficiency surveys
- Wire & cable
- Wiring devices
- Motor control
- Crane control
- Safety and OSHA-compliance seminars
- Fans
- And much more

**For these benefits and more, get started with Royal Electric today.
