

Chatter

1. Add strain info
2. Have some strains that are recommended for medical conditions
3. Keep medical conditions simple for now
4. Allow liking / sharing on strains
5. Allow comments?... Maybe not in MVP

What is most important?

1. Getting updates on strains
2. Easily finding good strains

And that's it.

Focus to be on symptoms / medical conditions.

And seeing updates related to previous symptoms / medical conditions searched on? But maybe not... only if they following the strains?... Or if they following the symptom / medical condition?

Condition / Symptom? Strain?... on strain? People only like conversations with each other... hmmm... not so much all comments? So mix and match.

Profile for conditions you are following, Ciara SotoCiara Soto kit for strains you are following

Conditions you are following is just preferred content... other awesome content could still be of interest.

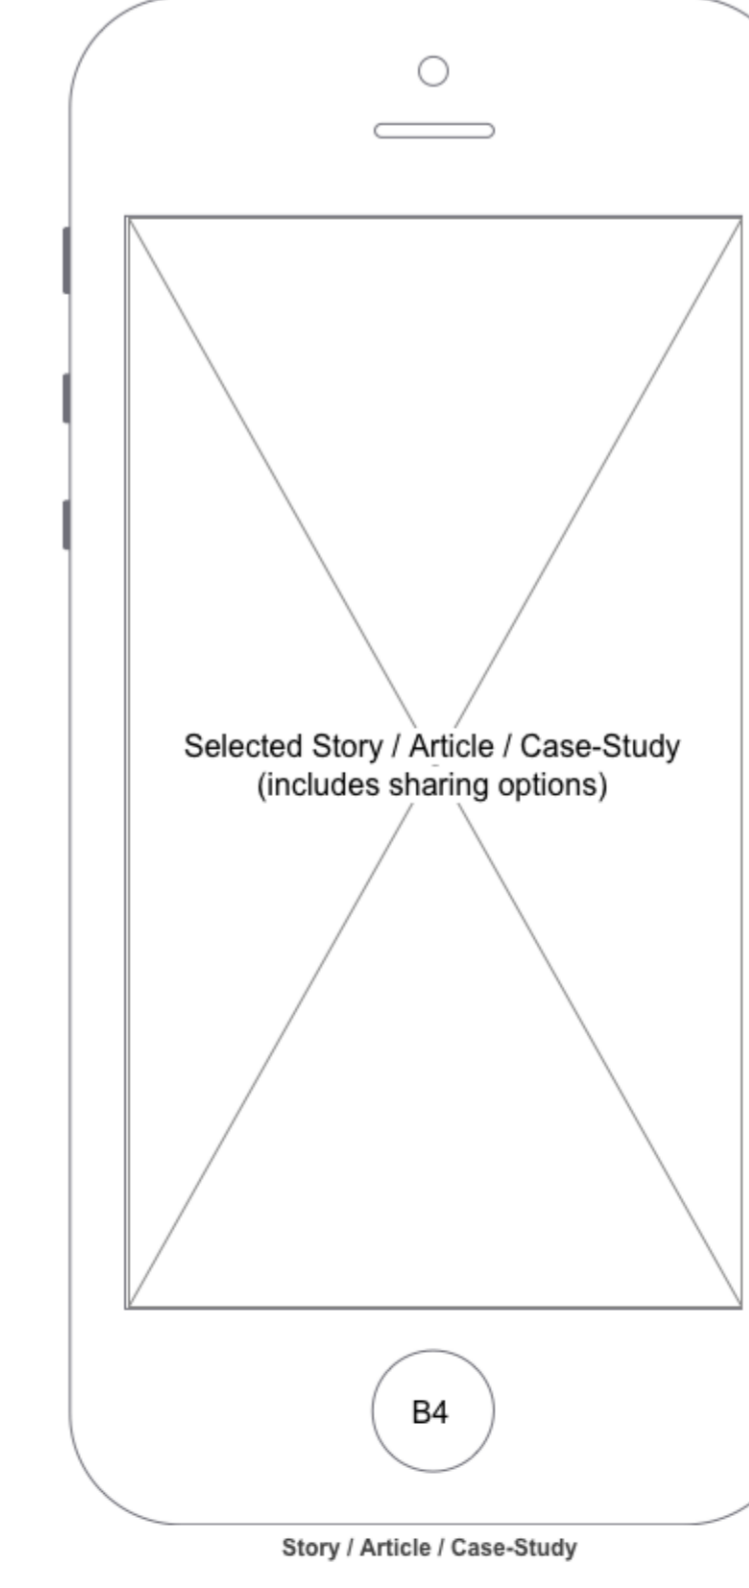

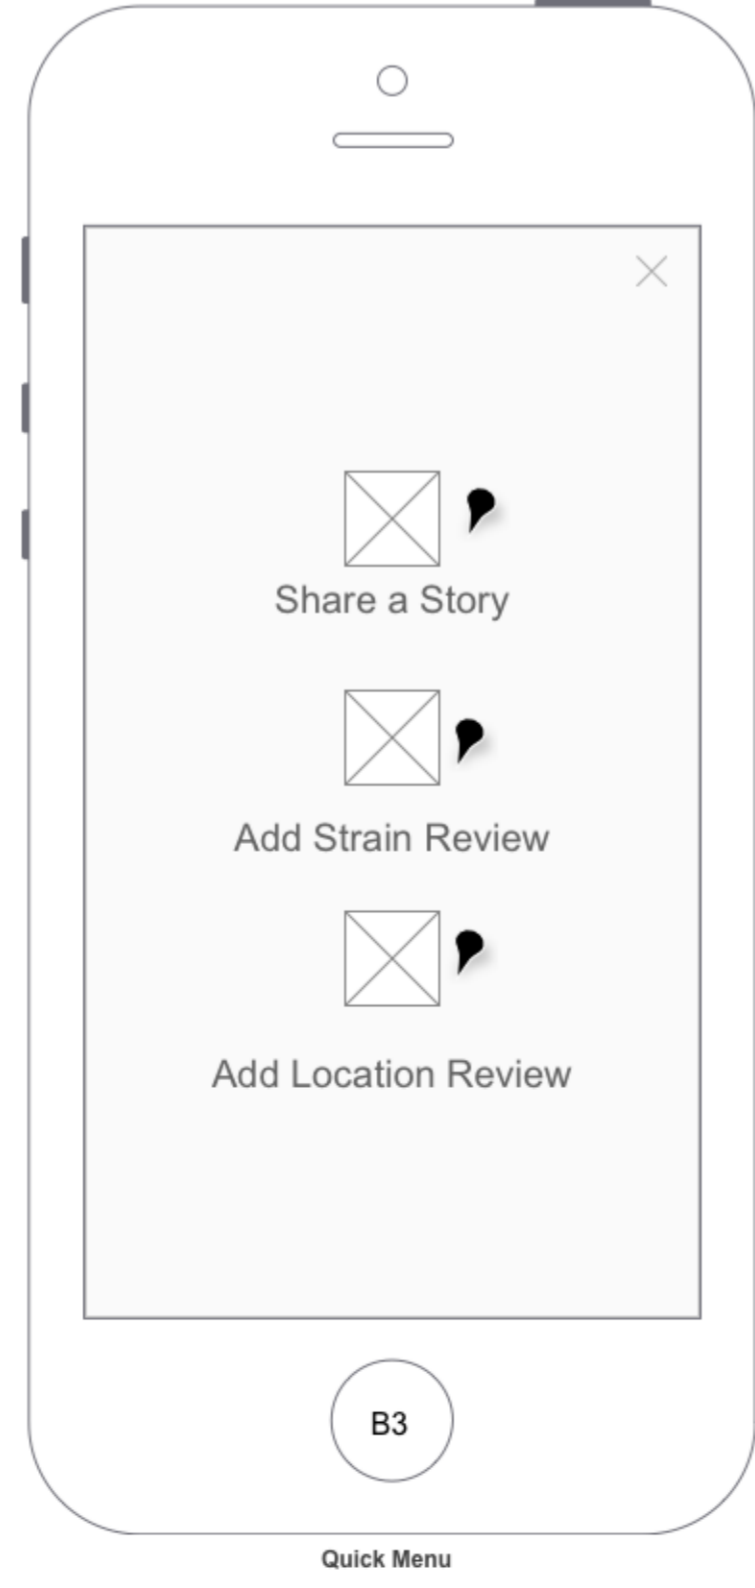

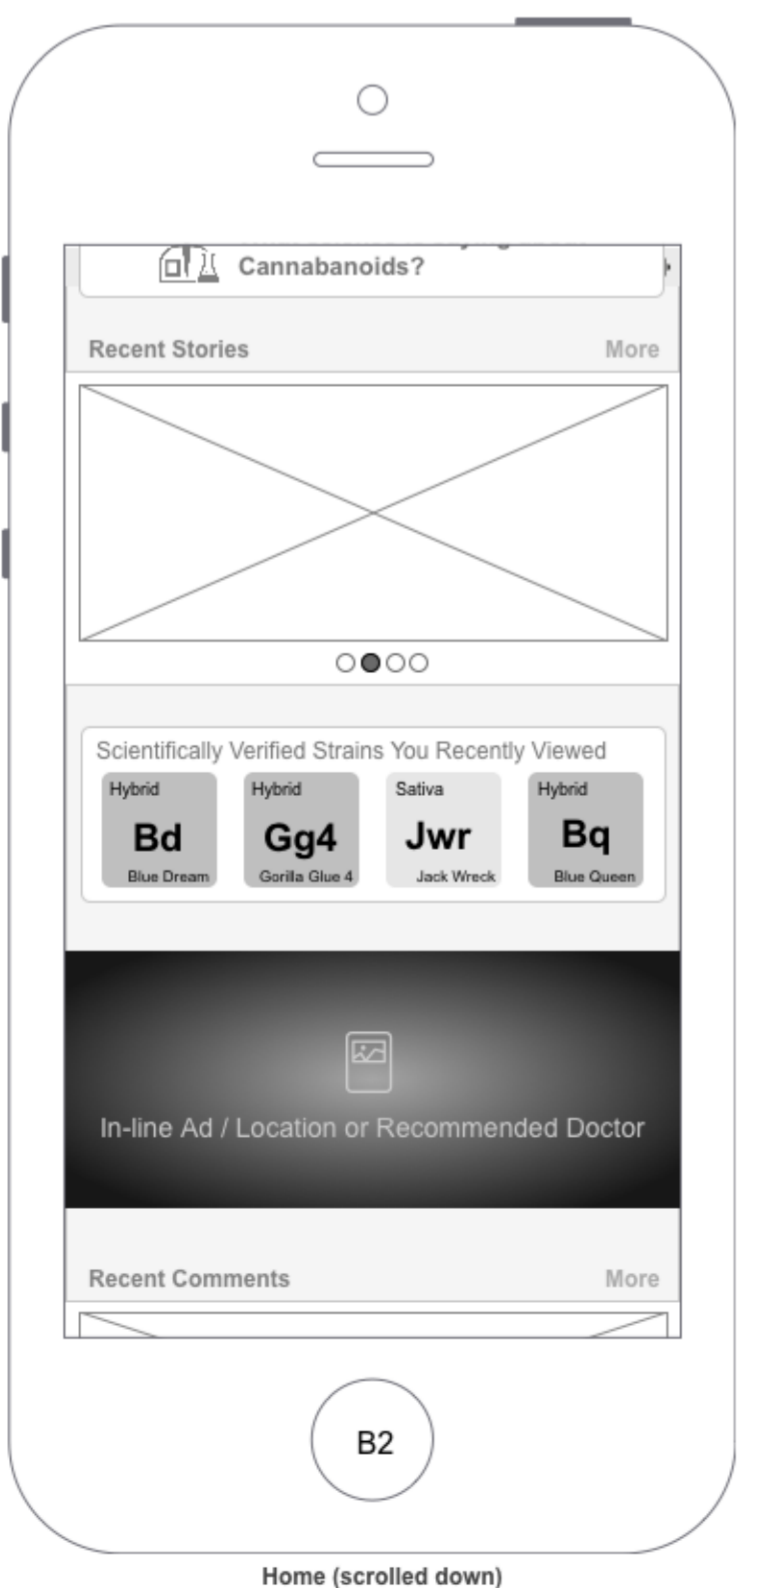

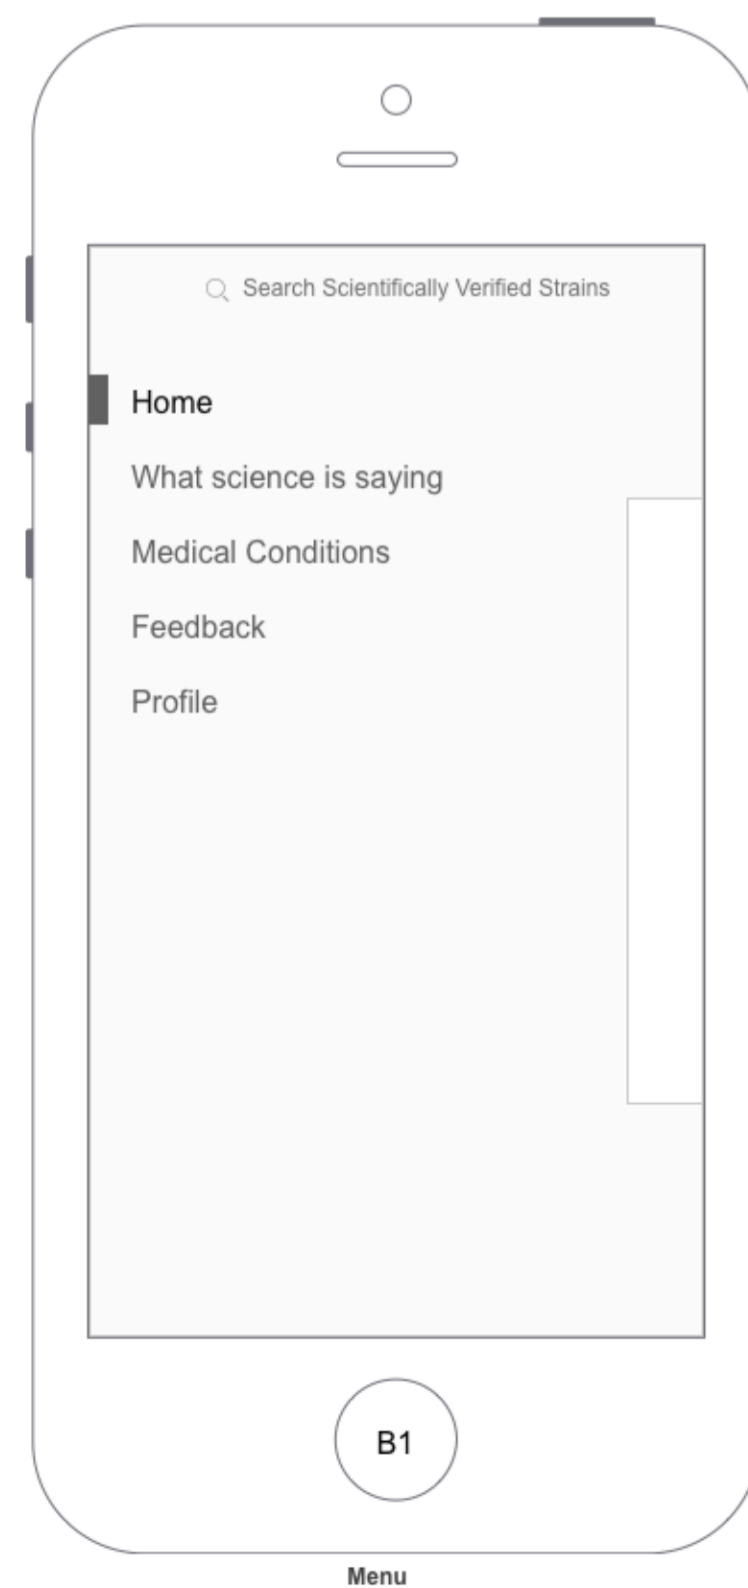

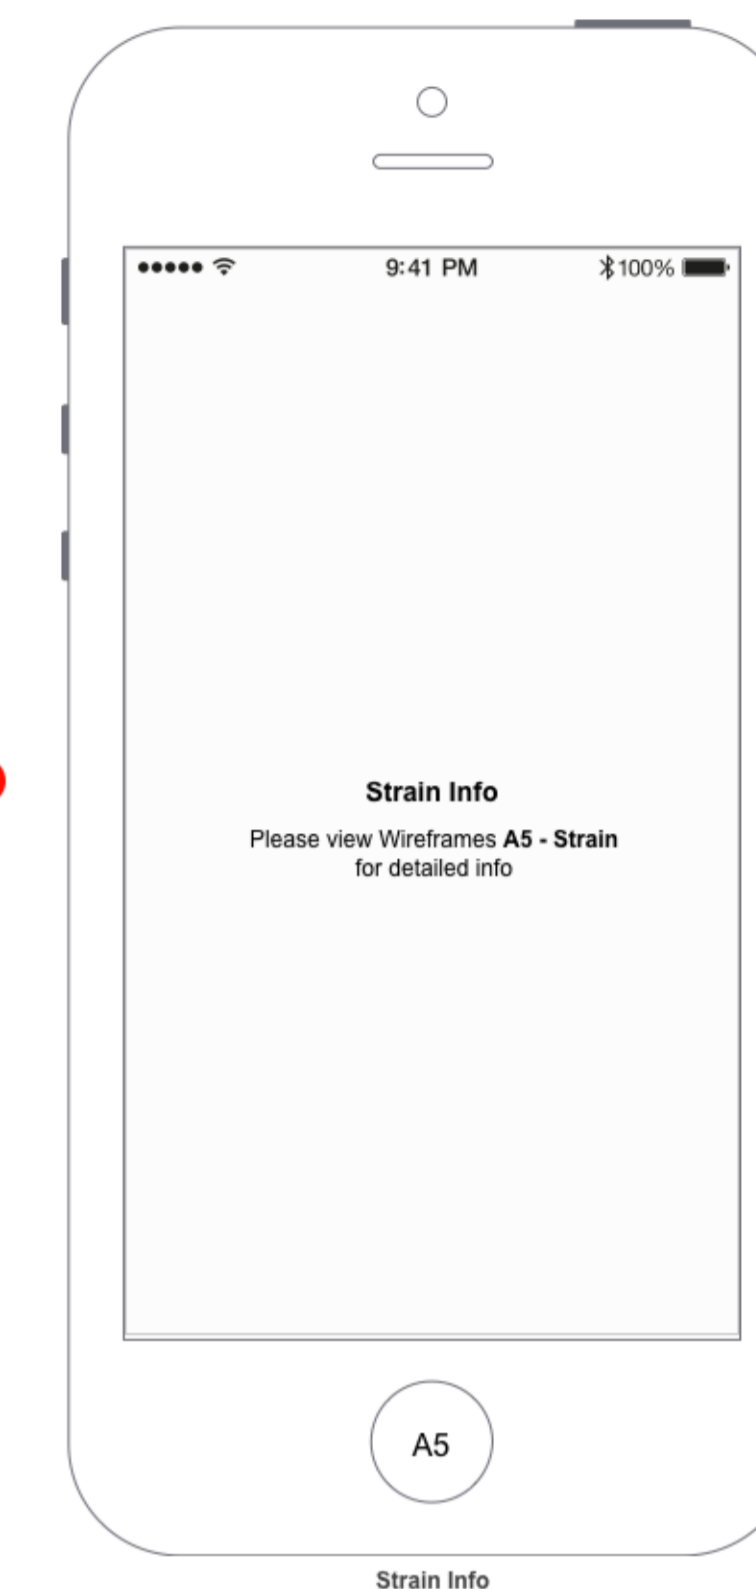

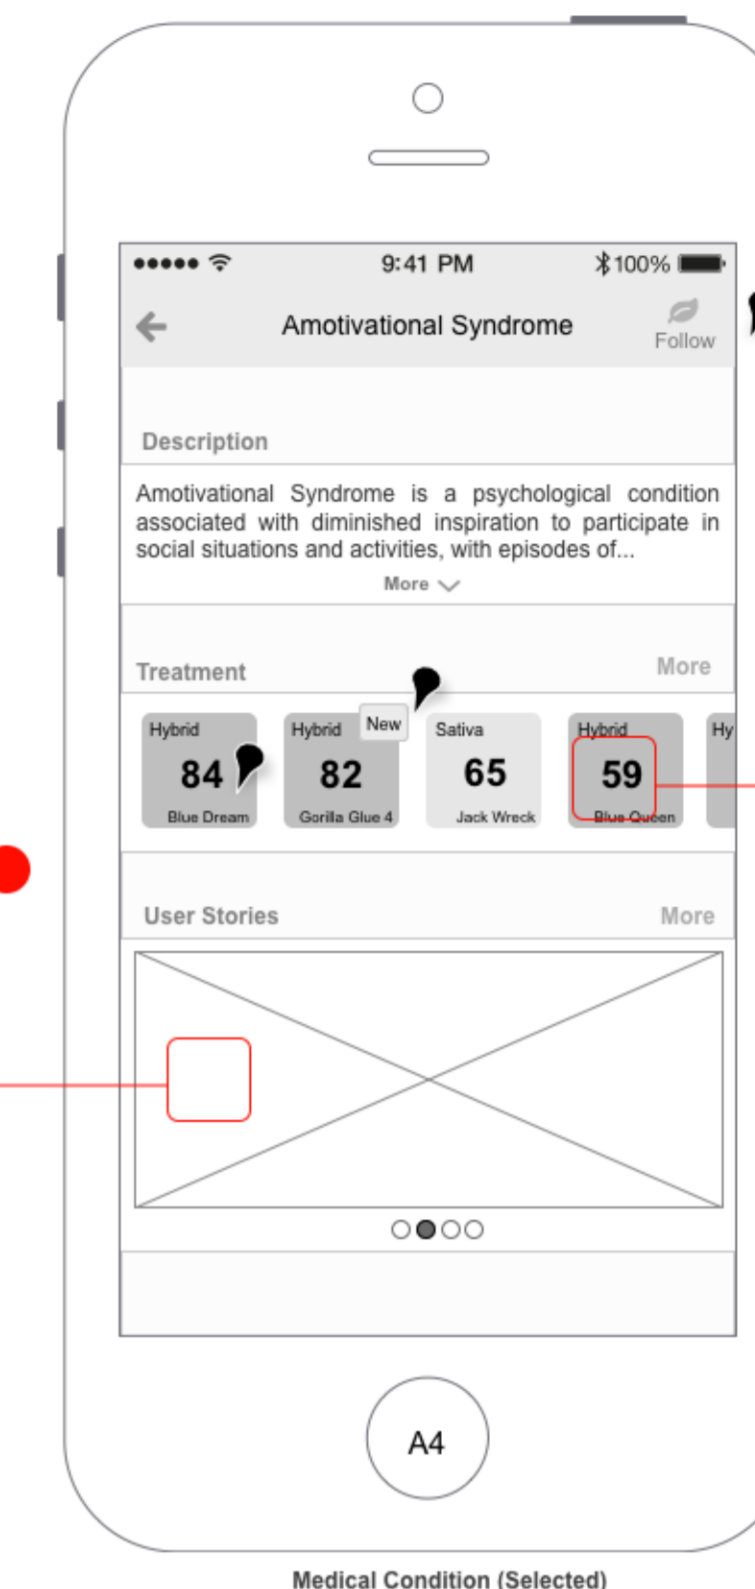

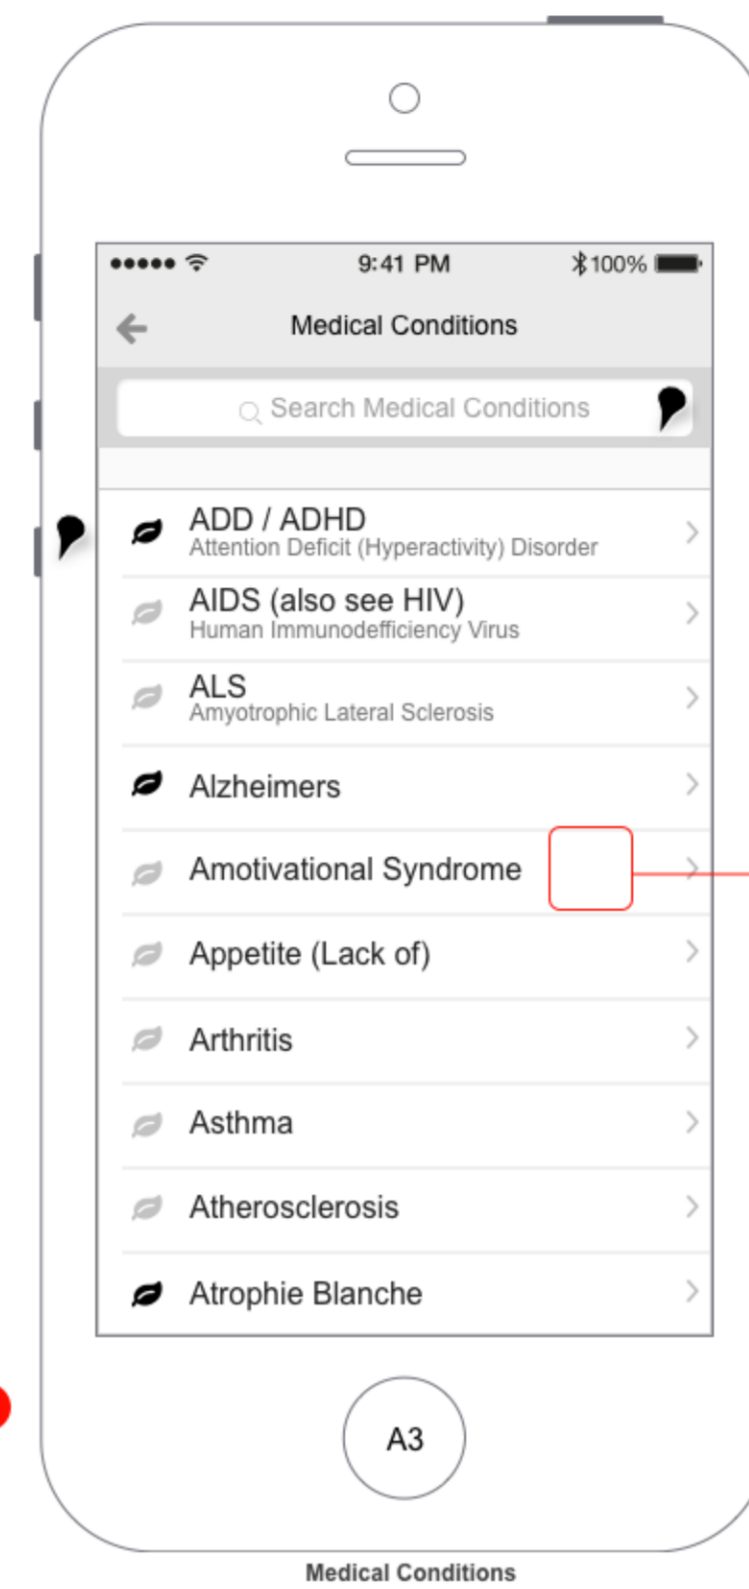

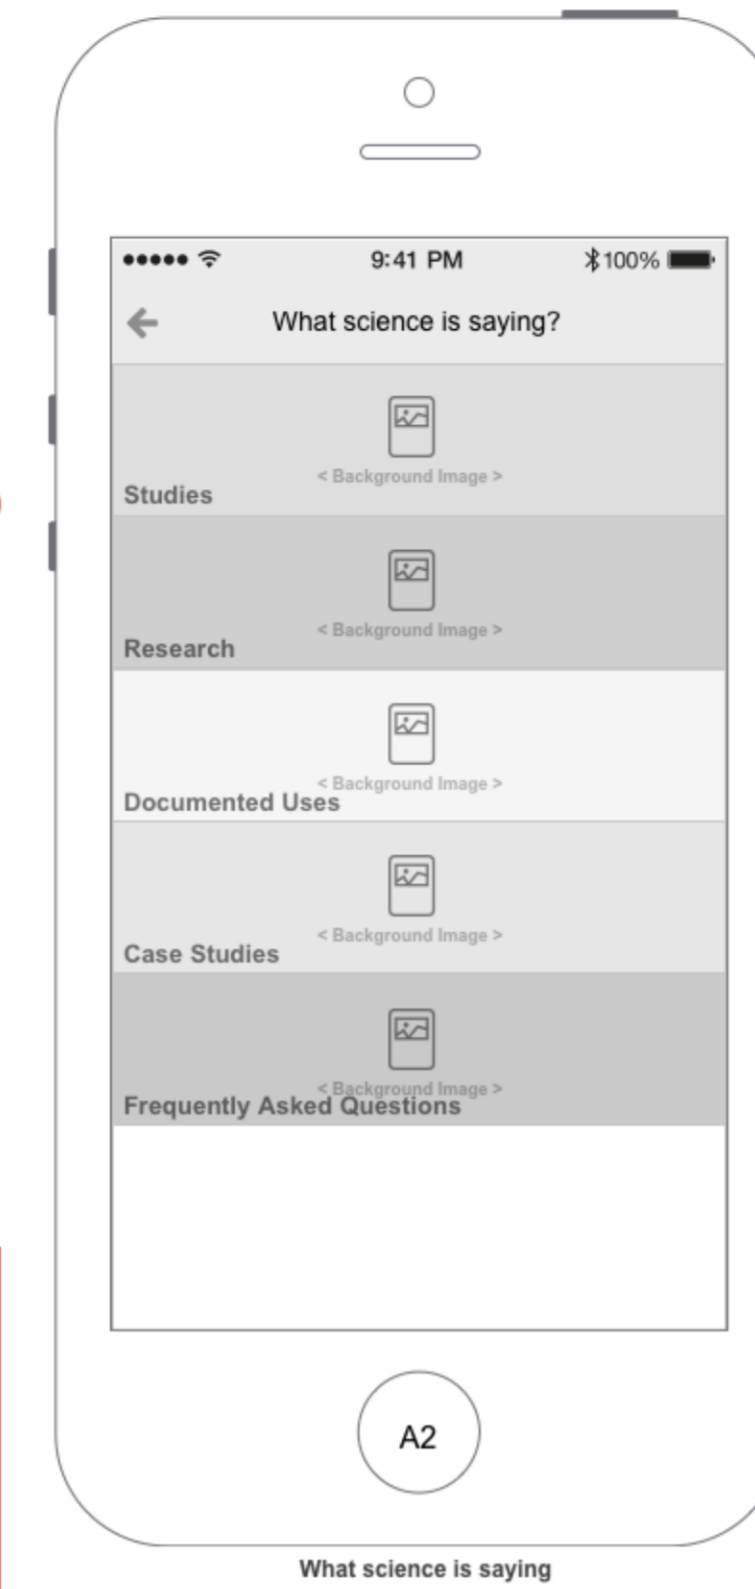

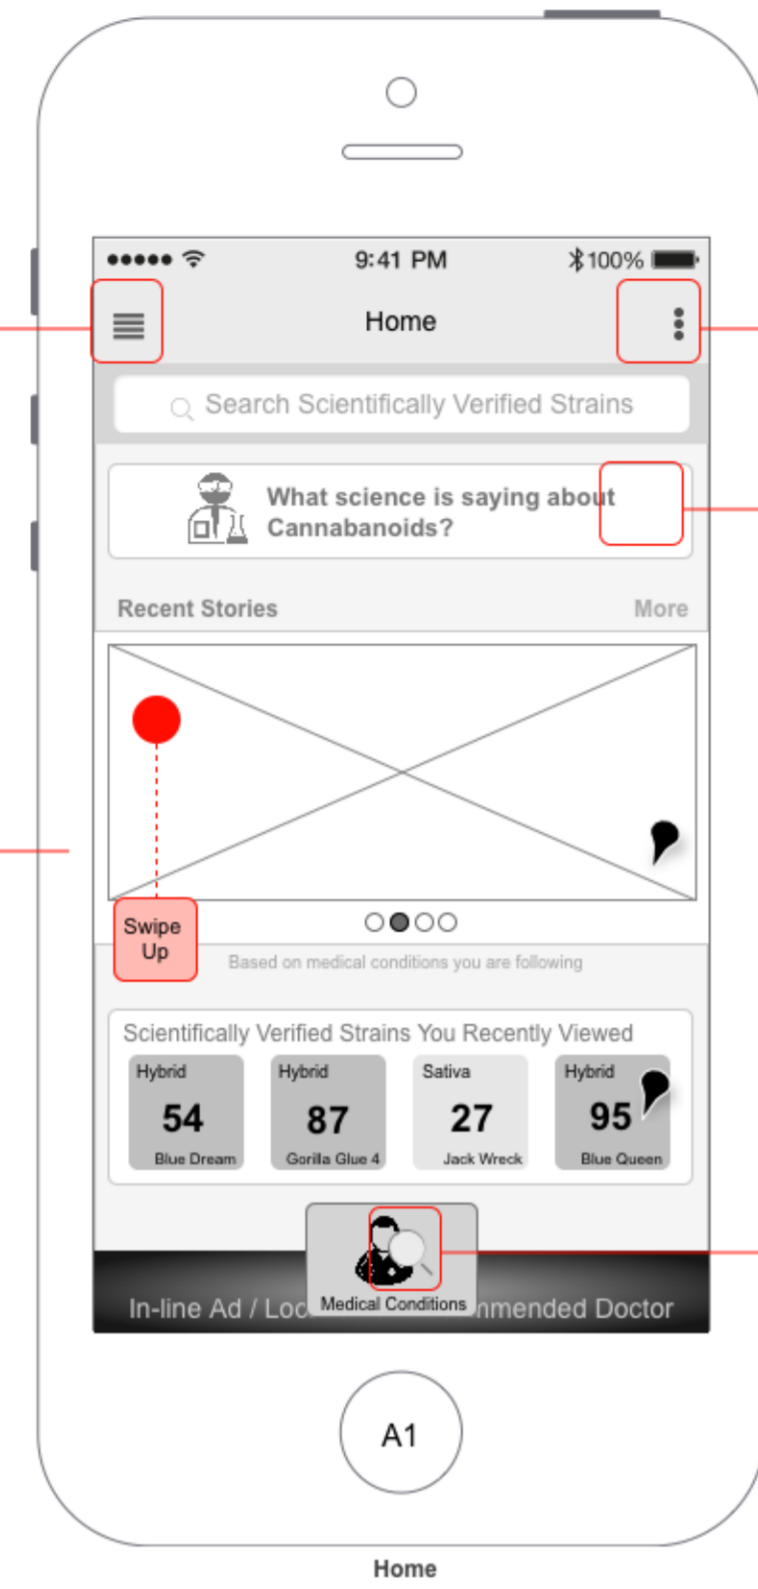

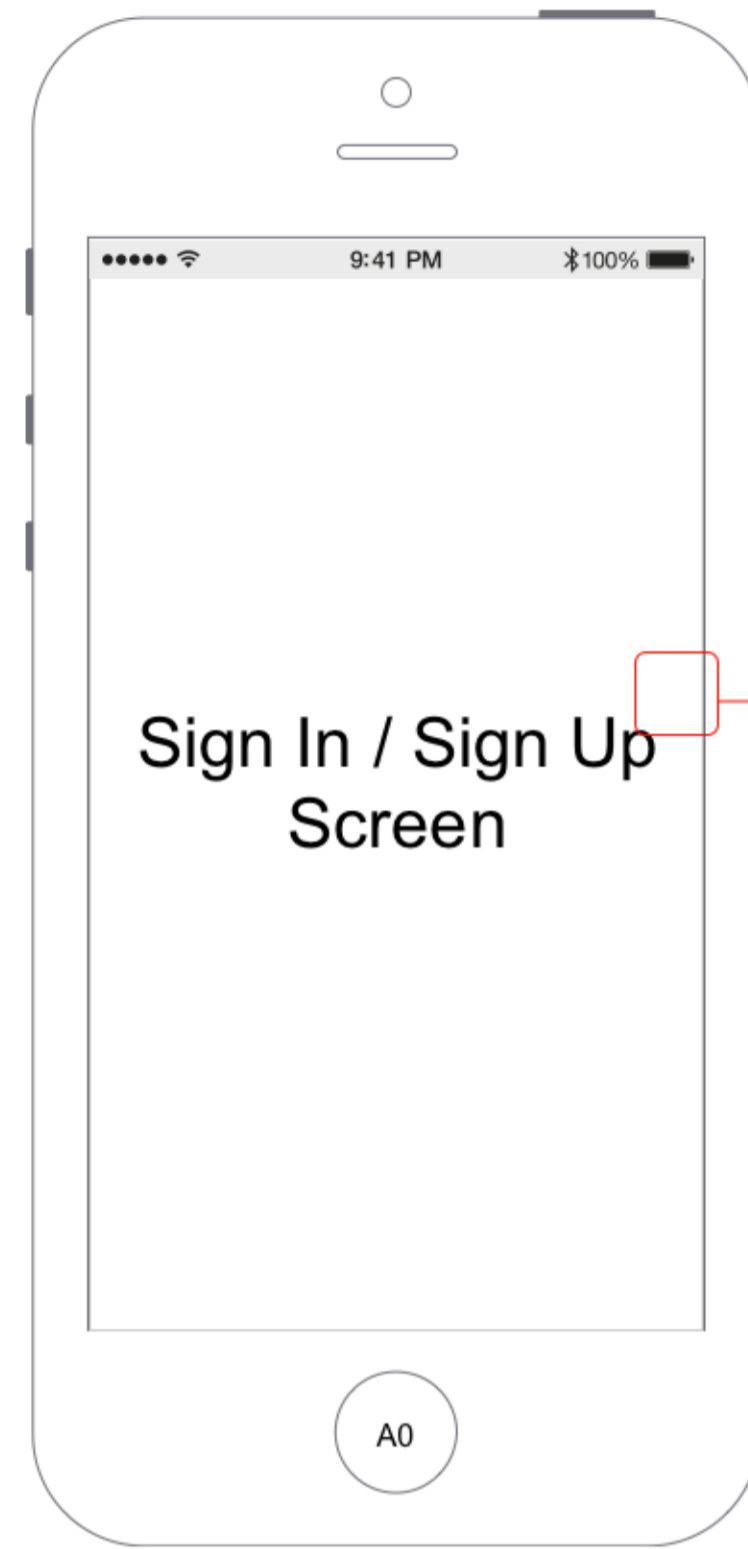

Show recently viewed strains
Allow user to set medical conditions and symptoms on their profile to be notified of strains that can help
Show recent updated strains or news / comments

Stories can be mix of video and images.

Home screen shouldn't be articles, it should be comments / discussion related to the strains and conditions they are following.

I'd like to see stories of others who were cured. Following medical conditions.

Strains then is more just comments / experiences. Nice news would be to see new strains available
