

leukemia - lymphoma - myeloma

**how do you
cure cancers
you can't
screen for or
prevent?**

you donate.

Every 3 minutes a person in the U.S. is diagnosed with a blood cancer. There's no screen for early detection and no method of prevention. Over our 66-year history, LLS has invested more than \$1 billion in research, touching nearly every therapy currently used to treat blood cancer patients. Today LLS is changing the cancer landscape with new knowledge about harnessing and unleashing the body's immune system to attack cancer cells. We are determined to find cures and create a world without blood cancers. Help us finish the job.
