

The \$7.95 model is pretty bare bones. I have told Poho where there are a few places that can be cut back and added in such additions as a hood.

picture frame clips

\$ 2.95 Price Point

These clips can be bought at Michael's. They work for metal picture frames and it may be a simple solution, or at least cost no more than the existing clips on the \$7.95 price point light. It will also give it a different appearance but, should hold the glass a little more uniformly.

OR

- push in and turn to this position

- only needs inserting once
