

1906 HOUSE

From 2005-07, Snap Design designed and supervised the complete renovation of a 1906 house in Brookline, MA. All of the original details were in tact, the house had never been touched.

The goal was to retain as many of the old materials available to us and impart a modern sensibility on the design.

1.

CASE STUDY

Old windows were repaired, old doors, hardware and flooring relocated, marble surfaces and pantry doors were reinstalled in the kitchen, and bath fixtures refitted and reused.

The finished house is modern, but it retains its original beauty and connection to the neighborhood.

RENEW

With consulting advice from architect Ingrid Strong exterior porches were redesigned to enhance the living experience indoors and outdoors.
