

BATH

One of life's most delicious pleasures is that of immersing yourself into a bath filled with a beautiful salt blend and a soothing scent. Since ancient times, bathing has been considered indispensable to emotional and physical health. As far back as 5000 B.C., the Ancient Egyptians used bathing as a means of healing the spirit and certain aromatic baths were believed to produce magical effects on the body. Imagine creating this environment within your own home. Create light, aromatic blends, soft music, flowers and AT LEAST 45 minutes in which you have deemed yourself the most important being on the planet. Allow NYRAJU to provide you with the necessities for such an experience.
