WHAT ARE THE BENEFITS OF CHOOSING A NONTRADITIONAL OCCUPATION?
Currently, the need for workers across the nation exceeds the supply of trained workers.

Both traditionally male and female occupational areas are in need of highly skilled workers. Traditionally, gender does not matter if the individual has the necessary skills.

Studies indicate that a well-education standard requires wages ranging from \$10 an hour up to \$15 an hour or more, depending upon area of residence, family size, and the like. Why the traditional "women's job" pay scales that will support economic self-sufficiency.
