

PHOEBE'S FIELD™

MISSION STATEMENT

Phoebe's Field™ is an exhibition that triggers kids to make their own cognitive leaps. This *extra-spatial* environment – rooms to play with, tug at, and transform – allows complete immersion where learning is experienced in three dimensions, and is about the invisible force and structure of fields.

A central focus is bringing science to girls, helping them redefine it, making it applicable to *their* lives. The long-term purpose is to build and retain interest in science and technology by revealing science in unexpected places and the powerful role we should all have in it.
