MISSION STATEMENT

Our mission here at PRO AG is to change the national legislation to help protect dairy farmers. It costs more to produce the milk than it is to sell it. Dairy farmers usually have to hold second jobs just to make enough to support their families and the farms that they own. PRO AG wants to change the legislation for the consumers.

We feel that the consumer cares about the food that is being produced and will demand a more fair system for farmers. We want to educate non-farmers who care about the health of themselves and the health of their children. We want to teach them about the products and how to ensure a fair system to the dairy farmers.
