

Improve your Operations

Upgrade your Control Room with the latest Mitsubishi digital Display Wall technology

Mitsubishi Electric Display Wall Systems increase efficiency of decision making in control center operations by providing a large canvas capable of ample resolution and brightness to visualize and share your entire SCADA, GIS, Data and Video applications in real time on a virtually seamless Display Wall, engineered specifically for unsurpassed reliability in 24/7 Control Room operations. Our newest LED light source models further improve your investment with up to 30% less power consumption, easy expansion flexibility and barely any maintenance or replacement parts required during 10-years of continuous operation.
