

Revenue Cycle Solutions, Inc.
healthcare for your revenue cycle^{MS}

“Because of the unique way we deliver our solutions, it has been communicated by many clients that we set ourselves apart from the marketplace in several ways:

1. Cyclogic, our revolutionary technology platform that runs the business processes behind our Extended Office Services (EOS) offering supports our efforts to exceed our client’s expected outcomes. As a direct result, we have changed the fundamental business process of billing and rebilling insurance carriers, by doing it almost completely electronically and daily on every account.

2. Besides leveraging our unique technology, we enhance operational efficiency by dedicating representatives to specific payer categories instead of specific clients, thereby adopting the efficiencies of a pooled, centralized environment. We have thereby solved critical industry problems affecting every other receivables management firm, and created a new way of providing programs to create a compelling, sustainable competitive advantage.

3. The most critical differentiator of RCS is the obsession with customer service that we build into our management team and our employees. We recognize that we are an outsourced arm of the hospital and believe that everything we do is a reflection of the hospital, whether we are interacting with your payers, your patients, or your guarantors. We understand the value we can add by identifying A/R problems upstream and helping you to implement solutions that improve your patient satisfaction and bottom-line results. We understand that our success is measured by just one variable - - Your satisfaction with our results. Short of always acting morally and responsibly, nothing else matters.

RCS is a national firm with hospital clients from New York to California. Our corporate headquarters are located in Downers Grove, IL with an additional operations center in Hoover, AL. We have 140 employees at our headquarters in Downers Grove, IL and 101 employees at our satellite office in Hoover, AL. Providing EBO Self-Pay, EBO Insurance and Bad Debt Collection Services, RCS is 100% dedicated to servicing the collections needs of healthcare providers, both hospitals and physicians - We do not collection accounts from any other industry.”
