Shape tomorrow

At Intel we look for people who want to shape the future. People who want to influence tomorrow's technology and play an active role in the growth of their career. The kind of people who live for a challenge and are never satisfied with less. Does this sound like you? Then Intel is the place to be. We're a high-tech industry leader. One who is evolving at an amazing pace and entering into new markets such as networking, wireless communications, e-Business and servers. So take this opportunity to apply your business expertise to tomorrow's greatest technologies.

w's technology

You'll work among people of differing backgrounds and experiences in an inspiring environment - one where teamwork is balanced with the recognition of personal achievements. We encourage you to explore opportunities across the company that will increase your knowledge and expand your experience. If there's an idea you want to explore, a technology you've always wanted to learn about, a discipline you'd like to master, you'll have the freedom to do it at Intel.

Make innovation

Marketing

Now you can drive some of the products that are changing the way we live and do business. Your problem-solving skills will help take one of the world's most recognizable brands towards entirely new competitive horizons. We are entering into many new areas that require great analytical thinkers. Join either our strategic or product group and lead the marketing efforts of products such as mobile PCs and wireless handheld devices. You'll gain experience in areas such as brand management, competitive analysis, advertising, new business development and channel marketing.

Planning and Logistics

Intel delivers an evolving range of products to a world full of customers. Managing this operation is an ongoing challenge - and planning and logistics plays a crucial role. We have people across the globe that are responsible for our world-class supply chain management process, and they operate leading-edge technology and systems to keep us running at peak levels. Activities include forecasting and distribution, web-based order management, build plan development and supply line management.

Materials

Intel turns great concepts into reality. To do so, we need to source all the materials and services demanded by state-of-the-art product design, manufacturing, marketing, IT and assembly/test operations around the world. Managing this supply chain involves functions such as planning, purchasing, managing suppliers, inventory and e-Business initiatives.

Intel Capital

We maintain one of the largest corporate venture programs in the technology segment, helping to establish innovative technologies, develop industry standard solutions, drive Internet growth and advance the computing platform. This means we can offer you an inside perspective on the emergence of new technologies and their strategic importance and a unique opportunity to help influence future developments. Supporting one of our deals could involve you in everything from business plan evaluation and financial analysis to market research, negotiation and relationship management.

e-Business

The Internet is transforming our business - and we're making it our business to transform the Internet. Current initiatives range from providing application hosting and streaming media services, to our internal activities of applying the latest e-Business applications to more effectively run our business. Our efforts have resulted in a web site that receives almost 93% of our orders - around \$2 billion of business a month. You'll have the opportunity to get involved in emerging technology assessment, application analysis, project management, channel e-Content analysis and information system development.

Finance/Accounting

We work in competitive markets, and our success is measured in numerous ways. One of the most important is the maximization of shareholder value. Our operational finance professionals work closely with different business areas to drive and resolve strategic issues as advantageously as possible and enhance our profitability. Accounting specialists focus on accurate management and external reporting and control. Activities range from fixed asset and financial statement analysis to compliance work - quite a challenge when you consider that our annual revenues approach \$30 billion.

Human Resources

All our strengths ultimately arise from our ability to attract and retain the best people. Our HR group helps to advance our business goals day to day while continuing to define and strengthen our culture in the longer term. We offer the opportunity to take on an exciting range of challenges: from devising recruitment strategies to organizational development and employee communications to designing compensation and benefits programs.

your business

Rotations and Internships

We encourage employees at all levels within Intel to grow, develop, and pursue their individual aspirations. Below are several development opportunities we offer to both current students and recent graduates.

MBA Rotation Programs

Our rotation programs are designed to provide MBA candidates with a diverse exposure to Intel business groups and a wide variety of experiences.

Internships and MBA Rotations

If you're a full-time student looking for real world experience, come to Intel. We offer a range of internships that allow you to get involved in exciting, important projects while enjoying a comprehensive compensation and benefits package. The majority of placements occur during the summer months but some are available throughout the year.

Planning and Logistics

This rotation opportunity will enable you to gain a broad perspective of Intel supply chain processes. You'll gain exposure to at least two Intel sites, spending six months in each of our functional areas: customer service and geographical planning, division planning, factory planning and logistics.

Human Resources

This flexible, year-long program enables you to gain exposure to between three and five functional areas within human resources, while working at one or more of our sites.

Apply directly by sending your resume to:

collegejobs@intel.com

Please provide your GPA in your resume, and include keywords and phrases describing your skills and experience. Your ASCII text resume should appear in the body of your email.

If you cannot submit your resume electronically, mail your standard format, letter-quality resume on white paper to:

**Intel Corporation
Staffing Department
P.O. Box 1141
Folsom, CA 95763**

Employment Information:

Intel hires qualified candidates who are authorized to work in the U.S. - that is, authorized to work without restriction to a particular employer. This includes U.S. citizens, U.S. legal permanent residents, temporary residents granted legalization under the Immigration Reform and Control Act of 1986, asylees, and refugees.

For foreign nationals who do not fall in one of the above categories, we limit our hiring of persons requiring visa sponsorship or individuals currently on a non-immigrant visa (e.g., H-1, J-1, L-1, F-1, B-1, TN) to candidates who are applying for positions for which there is a demonstrated shortage of qualified U.S. candidates.

You may be considered for international positions if you have the legal right to work in the country of interest. Relocation assistance may be limited and compensation will be based on local practices. Please see our web site for details on how to submit your resume for a position in your country of interest.

At Intel, we are committed to equal employment opportunity. We respect, value and welcome diversity in our workforce, as well as in our customers, our suppliers and the global marketplace. Intel also values being a great place to work and strives to maintain a safe and drug-free workplace.

Accordingly, Intel conditions all offers of employment on satisfactory completion of a drug screen and a criminal history background check.
