

# CRYPTID CRAWLS

Pick up a thermal camera at the Nature Center and head out into the woods on a one-hour expedition to capture mysterious creatures through your lens. As you walk through the park's trails, keep your eyes open –you might just experience sightings of elusive cryptids like Bigfoot, Mothman, and others along the way. After your adventure, return the camera, share your photos, and take home your prints as a unique souvenir of your cryptid encounter. Fun for all ages, this event provides for outdoor exploration and a little thrill of the unknown!

*Registration required at [herrickdl.org/events](http://herrickdl.org/events). Each session is limited to 15 groups. You may bring as many people as you'd like in your group, but you do not need to register each person. You will receive one camera per group/registration.*
