- Permitting approvals including QCD, Kahramaa and Ashgal.
- Complex Architectural implementation with 2000 individually sized glass panels and bespoke detail to deliver key design features such as bronze-clad Perspex water feature which acts as a skylight, bronze-clad punched picture windows with jumbo glass, bespoke oxidised theatre box and geometrical GRG ceiling courtyards.
- Updating of project specifications.

£60m Museum project consisting of 4x individual projects from design stages through to construction completion. Lead Architect and contract administrator role for mixture of contemporary new build and heritage refurbishment. Main responsibilities involved liaising with client, QS and contractor to assure project costs and schedule, holding monthly meetings as contract administrator, satisfying client requests, constant liaison with main contractor to work through appropriate detailing on site, direct constant liaison with all sub-contractors to refining desired aesthetic and manufacturing methods to comply with regulations and project schedule, assigning product specifications and general action to maintain a fluid project. Complex Architectural implementation with 2000 individually sized glass panels and bespoke detail to deliver key design features such as bronze-clad water feature which acts as a skylight, bronze-clad punched picture windows with jumbo glass, bespoke oxidised theatre box and GRG ceiling courtyards.

Completion of construction drawings for Doha Golf Club, Qatar. Within 10 weeks I personally coordinated and led Architectural, structural and MEP disciplines to complete all drawings and details. Further to this I informed the specification production and also generated the façade design strategy report. I personally led 2x workshops in Delhi, India, to coordinate the production of the interior design and certain core information.

ARUP Associates (Nov 11' to Aug 12')
