

# Access all the data science tools you need, in one place.

“Data Science Experience is the first solution we’ve seen that offers machine learning, integration and automation on a single, coherent platform.”

– Baltazar Ozonек, GroupM Nordic

IBM Data Science Experience has several differentiating capabilities such as:

## Support of Open Source

R, Python, Scala and SQL first class support in tools such as Jupyter Notebooks, Rstudio or Zeppelin

## Easy to use, learn and collaborate

Data Scientists, SMEs, Business Analysts and Developers all in one environment

## Time to value

Choice of code or no-code tools to build and train your own ML/DL models

## Multiple entry points

Free version available on public cloud and individual tools like SPSS available

## Deep learning at scale

You can focus on designing your neural networks, monitor batch training experiments and then compare cross-model performance

## Choice of algorithms

Embrace open source Machine Learning and Deep Learning frameworks

## Hybrid Machine Learning

Deployment of models anywhere such as IBM Cloud (fully managed), Private Cloud or on Edge devices.
