Build Smart on Kubernetes

India

Join us virtually on
November 10-12,
2:00-4:30pm IST

Build applications with speed, agility, and confidence

Jumpstart your understanding and experience of application development on Kubernetes featuring Red Hat OpenShift. Starting with an exploration of containers, you'll rapidly move into a series of hands-on experiences that demonstrate why OpenShift is a rich, enterprise Kubernetes platform for development of cloud-native applications.

This event has learning activities for all skill levels. Focus areas include:

Day 1

Learn the Basics:

Getting up and Running

Day 2

Explore Applications:

Operating our Clusters

Day 3

Go Deeper with OpenShift:

Extending our
Cluster's Capabilities

Attend the tech talk sessions that showcase industry best practices and use cases from technical leaders across IBM and Red Hat as they share their expertise and help elevate your skills with the open source you want for the technology you need.

Space is limited so act quickly.
