

# Create optimisation models like an expert.

[Watch demo](#)

We hope you found the free trial of IBM ILOG CPLEX Optimisation Studio helpful. If you haven't explored the capabilities of the tool yet, here's a guided demo on how to build optimisation models to transform decision-making.

**Using IBM Decision Optimisation, you can develop and deploy machine learning and optimisation models to drive operational efficiency. The solution enables you to:**

Perform optimisation modeling in Python

Use mathematical and constraint programming optimisation engines

Follow typical optimisation development steps with the help of a model builder

Communicate the optimisation model results using dashboards

Deploy and manage optimisation models through REST API access point

Start using IBM ILOG CPLEX Optimization Studio Free Edition today and see how you can optimise business decisions.
