

Data discovery made quick and easy, with IBM Cognos Analytics.

[Start free trial](#)

What if one analytics solution can provide accurate business intelligence across your entire organisation?

IBM Cognos Analytics does that by helping you confidently monitor, explore and share insights from your data. The solution offers smarter self-service capabilities for you to easily create compelling visualisations and dashboards.

Using IBM Cognos Analytics, you can:

Quickly analyse and visualise your data to get the answers you need

Unleash your creativity with simple drag-and-drop visualisations

Share reports across the organisation with the click of a button

Take instant action with live data analysis

Get an overview of the capabilities of IBM Cognos Analytics and explore the User Interface.
