

P448 Jack Low

LAST: P448

- Sleek Profile
- Round Toe
- Lateral Swing
- Strong Medial Ball for extra room & comfort
- Subtle toe spring

Eco Friendly

All OrthoLite® foams contain 5% recycled rubber, helping keep hundreds of tons of waste out of landfills each year.

High-Level Breathability

OrthoLite's open-cell PU foam is 95% to 100% breathable, allowing air to circulate in and around the insole, keeping the foot cooler inside the shoe.

Lightweight

OrthoLite insoles are lightweight, enhancing the performance of the shoes with airy comfort.

Long-Term Cushioning

Unlike traditional insoles, the compression set of OrthoLite insoles is less than 5% over time so the cushioning and fit never change inside the shoe, providing maximum comfort every time you put your shoes on.

Washable

OrthoLite insoles are machine washable, coming out like new every time while maintaining all of their performance benefits after washing.

Moisture Management

The unique open-cell structure of OrthoLite insoles creates a moisture management system, helping to move moisture away from the foot to provide a cooler, drier, healthier shoe environment.
