## Who We Are

Pacific International Maritime Medical Service, Inc. (PIMMS) was founded in 1997 with the goal of bringing consolidated medical services to the deep water Columbia and Willamette River ports. PIMMS provides medical services focusing on the interests of the patient, agent and vessel owners.

PIMMS understands the complicated and time-sensitive nature surrounding the maritime industry. We take our customer's problems and make them our own. PIMMS ensures, with every encounter, crewmembers receive top quality medical care. This improves the crewmember's chances to remain fit for duty and mitigates the owner's expenses in the future.

## Complex Medical Management

Medical situations can become complicated very quickly, as in the case of hospitalizations. PIMMS medical management team becomes the primary point of contact and works directly with P&I Clubs, correspondents, hospitals, medical staff, ship owners and agents. PIMMS manages the case from the time patients are admitted to the hospital until the time they are discharged.

PIMMS inpatient case management yields significant reduction in length of hospital stay and rapid movement to less expensive outpatient services or repatriation.

PIMMS also holds a unique expertise in global repatriation. PIMMS ensures the smooth transition of care, and is experienced in providing full medically escorted repatriation to any location in the world.
