

MDF (MARS DEFENSE FORCE) OPERATIONS AND DUTIES

The primary mission was the defense of Forward Station Zebra and Grids 87 - 125 and 227 - 277 of the Mars Colonies. Secondary duties were to aid other divisions protecting the defensive grid, and, when organized by Command, to assault or join other forces in assaulting native Martian hives of Insectoids and Reptoids, the two sentient species on Mars, other than Earth humans. MDF troops operated in powered armor/EV suits using some type of gauss rifle or rail gun as our primary field-weapon.

MDF TROOPS are kept busy: if they aren't fighting, they are training. They are given recreation time but spend an amazing number of hours training for future combat missions.

The US Marine Corps special section was created by a secret executive order by President Eisenhower as a kind of institutional safeguard in case any of the space programs went rogue.

There is a definite “Military Faction” to the Secret Space Programs. Most of the “Military” or “Security” Forces were Mixed Military Forces (MMF). Most people who serve in these various security and military forces come from, or were associated with, regular military forces. Those were usually “drafted” into several other “Black Programs”, including the various Secret Space Programs and programs working within organizations on Earth referred to as “Secret Earth Governments” and their “corporate syndicates”. Those deemed to be “cut from a soldier's cloth” would be trained and enhanced in some ways to fulfill that task. This is when the Military Trained were splintered off into the various SSPs, or their corporate syndicates, integrated into the U.S., UK, CA, and AU Specialized Military Forces.

There is little information about the Truman and Eisenhower Administrations and their policies that created the “Break Away Civilizations” we have through the Military Industrial Complex. Both the U.S. Army and Marine Corps were used more than once to threaten what became the Interplanetary Corporate Conglomerates (ICC SSP) to open up their facilities and information to “Federal Oversight”. This, however, ended later on after the ICC Groups gained enough power to take control over the Corporate U.S. Government, and in time, most of the Pentagon and Civilian Intelligence Agencies. There was no direct reference to this U.S. Marine Corps Group in any documentation.

There are more than eight carrier crafts that are “Cigar” shaped, and some were in the range of a Mile Long. There were many different “Sizes” and “Classes” of space Vessels and Craft in the Solar Warden Fleet alone. Most are “Triple Hulled”. “Nautilus” is a “Class” of “Early Interstellar-Class Vessels”. “USSS” is used in documentation that had to do with “Personnel Assignments” and “Personnel Transfers”. Otherwise, none of the SSP groups refer to their vessels with a “USSS” Designation.

there are more than 8 of the “Cigar” shaped carrier class and other vessels of various sizes and classifications. They were designed to carry various types of “craft” that many think of as the TR-3B. These “Cigar” shaped Carriers were designed to carry a large complement of crew for extended periods and travel to “other Star Systems” (though Solar Warden was “mostly” kept to just inside our Sol System and the “Local Star Cluster” on rare occasions). The TR-3B is considered extremely outdated technology and in many cases has been gifted as “hand me down” craft to “Elites” within the Secret Earth Governments and their Syndicates as something akin to “Company Jets”. There are so many newer technologies that are of the same general shape as the TR-3B (& models that came after) that it would blow people’s minds. Most of them have completely “Modular” cabins that the Pilots can fly and dock into the fuselage of the craft they will be piloting. Most of them are “Triangle” or “Chevron” shaped to some degree, as well as the “Manta” shaped craft. For combat, however, they have moved more and more to “drones,” which a single pilot can control several of during sorties. I have always seen these craft controlled by “Neurological Interfaces” with the pilots (going back to the 1980s). I have not seen any craft piloted by “Fly by Wire” or “Stick and Throttle” means. There is no way to compensate for the extreme speeds and changes of direction with “Eye Hand Coordination”.

Older “Cigar” shaped Vessels were “Solar Warden Assets”. The other SSPs ended up acquiring newer, more advanced technological “Toys,” and the ICC-SSP always kept the most advanced and best for themselves. The ICC-SSP is a huge industry and a huge infrastructure in space that produces high technology for not only Human Breakaway Civilizations, but also civilizations from other star systems. There is a huge “Barter System” that is used “Out There” and the ICC-SSP has traded some very “Unsettling Things and even been involved in Human Trafficking/Trading” to acquire “New Technologies” to back engineer and produce for our Break Away Civilizations, as well as for trading under treaties with other civilizations. These people have no boundaries they are not willing to cross, to obtain more advanced technologies and “ET Biological Specimens for their research and interstellar commerce.

Companies like Lockheed, Northrop Grumman, and Boeing are heavily involved in the corporate space and the Solar Warden programs.

These ICC-SSP groups are also very much involved in “Human Trafficking” and use these poor people as a commodity to trade off to various races for various purposes (That I will not go into) for trade and commerce of high technology and biological materials, being insensitive to those who have loved ones who are missing people. Human trafficking is a horrible circumstance that is not focused on enough.

There are so-called “Super Boards” or “Super Committees”. Usually, what happens is that all of these very well-known Government contracting corporations that we know of (and some we do not) have a standing board member who will “Retire” and roll off their corporate board and then join one of the ICC-SSP Corporate Boards (Super Committees). They are then out of the limelight and still have their “Corporate Pull and Connections”. Solar Warden was a heavily Navy program, with Air Force involvement later on. Even though most come from the “Rank and File” Recruiting Systems, the “Brass” has been connected to the Military (some very much Constitutional supporters and believers in their “Oaths”). In recent “SSP Allied Conferences I have attended I have noticed a change. There are also quite a few new “Defector Groups” from some of the other programs no involved. Things have evolved in the Solar Warden SSP. Unfortunately, in the case of the ICC “Dark Fleet-SSP,” they have become more negative because of their Off-World Alien Alliances.

The Secret Earth Governments and their Syndicates (many call them the “Cabal” and “Illuminati”) have had complete control of the financial system of Earth for many hundreds of years. As many know, these same groups financed both sides of WWII (and EVERY War before and since) for various reasons to support their agendas. After WWII, much of South America was pretty much bought by the NAZI’s who set up enclaves, bases, and even cities throughout South America and even a couple huge bases in Antarctica. During this time, just about anything of interest in the field of high technology was co-opted by the NAZI’s covertly through Project Paperclip. The major SSPs are:

1. Solar Warden – Established early and is the oldest fleet (though it has gone through many upgrades over the decades). They have an R&D/Scientific focused fleet and a Military Offensive/Defensive-focused fleet that is mainly focused on policing the Solar System and surrounding Star Clusters and keeping track of “Intruders” and “Visitors” as well as locating and removing unauthorized “Visitors” on the Earth and other planetary bodies. Their program name describes their function pretty well.

2. Interplanetary Corporate Conglomerate (ICC) – Focused mainly on the development and acquisition of advanced technology by any means. Develop and Produce Technology for Commerce with Earth and off-world groups in a Barter System and leave nothing off the table that they were willing to trade. Very powerful, very classified, and always had all of the latest technology and “Toys” at their disposal.

3. Dark Fleet – Worked almost entirely outside the Sol System, Very Military (Offensive), Extremely Classified above the others, and were large fleets (similar looking Carrier Craft that looked like the Star Wars Wedge Shaped craft in the movies). They worked alongside the Draco Alliance and are speculated to fight alongside them in their affairs in other systems.

4. “NATO TYPE SSP” – Recently, in Alliance Conferences, they were referred to as the “League of Nations Program.” This group was based almost entirely outside of the Sol System and is a relatively newer SSP that was created for all countries to participate in, exchange information and technology, and encourage the countries to keep silent on the SSP Programs.

5. Various Special Access Programs SSPs that were small, usually had the newer technology, were very secretive, and worked for some of the Secret Earth Governments, Syndicates, and World Military Forces.
